### **Grammaropolis: The Parts of Speech**

**Workbook, Grade 3** Coert Voorhees 2020-09

Get to know the eight parts of speech with character-based instruction, engaging practice worksheets, dynamic writing prompts and exercises, and quizzes to check comprehension. Based on the revolutionary Grammaropolis approach, this skill-building workbook for third grade makes learning grammar fun! In Grammaropolis, adverbs don't just modify verbs; adverbs are bossy. They tell the verbs where to go, when to leave, and how to get there. A pronoun doesn't just replace a noun; Roger the pronoun is a shady character who's always trying to trick Nelson the noun into giving up his spot. Grammaropolis personifies the parts of speech based on the roles they play in the sentence, increasing both engagement and retention. Our story-based approach combines traditional instruction with original narrative content, appealing to different learning styles and encouraging students to make a deeper

connection with the eight parts of speech: nouns, verbs, adjectives, adverbs, pronouns, conjunctions, prepositions, and interjections. Aligned to Common Core and state standards.

**The Well-Trained Mind** Susan Wise Bauer  
2016-08-09 Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child’s education—by doing it yourself. The Well-Trained Mind will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child’s mind and comprises three stages: the elementary school “grammar stage,” when the building blocks of information are absorbed through memorization and rules; the middle school “logic stage,” in which the student begins to think more analytically; and the high-school “rhetoric stage,” where the student

learns to write and speak with force and originality. Using this theory as your model, you’ll be able to instruct your child—whether full-time or as a supplement to classroom education—in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Thousands of parents and teachers have already used the detailed book lists and methods described in The Well-Trained Mind to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of online resources, new material on teaching children with learning challenges, cutting-edge math and sciences recommendations, answers to common questions about home education, and advice on practical matters such as standardized testing, working with your local school board, designing a high-school program, preparing

transcripts, and applying to colleges. You do have control over what and how your child learns. The Well-Trained Mind will give you the tools you'll need to teach your child with confidence and success.

The book consists of chapters by researchers in well-established teacher education programs in 11 countries: Brazil, Canada, China, Finland, Greece, New Zealand, Russia, Saudi Arabia, South Korea, Turkey and

Teacher education is an area that has great potential for international cross-pollination of ideas and actions, and this book represents an important first step along this road.
