*Pounder's Marine Diesel Engines and Gas Turbines* Malcolm Latarche 2020-12-01

*Pounder's Marine Diesel Engines and Gas Turbines*, Tenth Edition, gives engineering cadets, marine engineers, ship operators and managers insights into currently available engines and auxiliary equipment and trends for the future. This new edition introduces new engine models that will be most commonly installed in ships over the next decade, as well as the latest legislation and pollutant emissions procedures. Since publication of the last edition in 2009, a number of emission control areas (ECAs) have been established by the International Maritime Organization (IMO) in which exhaust emissions are subject to even more stringent controls. In addition, there are now rules that affect new ships and their emission of CO<sub>2</sub> measured as a product of cargo carried. - Provides the latest emission control technologies, such as SCR and water scrubbers - Contains complete updates of legislation and pollutant emission procedures - Includes the latest emission control technologies and expands upon remote monitoring and control of engines

**Proceedings of the 2022 International Symposium on Energy Management and Sustainability** M. Ziya Sogut 2023-07-03 The International Symposium on Energy Management and Sustainability (ISEMAS) is a multi-disciplinary symposium that presents research on current issues in energy efficiency, social awareness, and global climate change. The conference provides a platform offering insights on the latest trends and innovations in energy management and the impact of sustainability on energy management processes. In this context, it aims to bring together sectoral, scientific, and demand-related elements in the field of energy. ISEMAS allows researchers, scientists, engineers, practitioners, policymakers, and students to exchange information, present new technologies and developments, and discuss future direction, strategies and priorities that improve environmental sustainability.

*Pounder's Marine Diesel Engines and Gas Turbines* Doug Woodyard 2009-08-18 Since its first appearance in 1950, *Pounder's Marine Diesel Engines* has served seagoing engineers, students of the Certificates of Competency examinations and the marine engineering

industry throughout the world. Each new edition has noted the changes in engine design and the influence of new technology and economic needs on the marine diesel engine. Now in its ninth edition, Pounder's retains the directness of approach and attention to essential detail that characterized its predecessors. There are new chapters on monitoring control and HiMSEN engines as well as information on developments in electronic-controlled fuel injection. It is fully updated to cover new legislation including that on emissions and provides details on enhancing overall efficiency and cutting CO2 emissions. After experience as a seagoing engineer with the British India Steam Navigation Company, Doug Woodyard held editorial positions with the Institution of Mechanical Engineers and the Institute of Marine Engineers. He subsequently edited *The Motor Ship* journal for eight years before becoming a freelance editor specializing in shipping, shipbuilding and marine engineering. He is currently technical editor of *Marine Propulsion and Auxiliary Machinery*, a contributing editor to *Speed at Sea*, *Shipping World* and *Shipbuilder* and a technical press consultant to Rolls-Royce Commercial Marine. - Helps engineers to understand the latest changes to marine diesel engines - Careful organisation of the new edition enables readers to access the information they require - Brand new chapters focus on monitoring control systems and HiMSEN engines - Over 270 high quality, clearly labelled illustrations and figures to aid understanding and help engineers quickly identify what they need to know

**Pounder's Marine Diesel Engines** Cuthbert Coulson Pounder 1998 Since its first appearance in 1950, Pounder's Marine Diesel Engines has served seagoing engineers, students of the Certificates of Competency examinations, and the marine engineering industry throughout the world. Each new edition has noted the changes in engine design and the influence of new

technology and economic needs on the marine diesel engine. This new edition has been completely re-written and re-structured, while retaining the directness of approach and attention to essential detail that characterised its predecessors. There are new sections covering principles and theory, and engine selection, and important developments such as the use of high speed diesel engines (for instance in fast ferry craft) are treated in full. In addition, numerous illustrations of all the listed types of engines appear in their relevant chapters.

*Proceedings of the 2nd International Conference on Green Energy, Environment and Sustainable Development (GEESD2021)* Dan Dobrota 2021-12-15 The need for green technologies and solutions which will deliver the energy requirements of both the developed and developing world to support sustainability and protect the environment worldwide has never been more urgent. This book contains the proceedings of the 2nd International Conference on Green Energy, Environment and Sustainable Development (GEESD2021) which, due to the COVID-19 pandemic around the world and with the strict travel restrictions in China, was held as a hybrid conference (both physically and online via Zoom) in Shanghai, China on 26 and 27 June 2021. It provided an opportunity to bring together an international community of leading scientists, researchers, engineers and academics, as well as industrial professionals, to exchange and share their experiences and research results in the energy, environment and sustainable development sector. In total, 80 participants were able to exchange knowledge and discuss the latest developments in the field. GEESD2021 attracted more than 250 submissions, 88 of which were accepted after an extensive period of peer review by more than 100 reviewers and members of the program

committee. These are included here, grouped into 3 sections, with 28 papers on sustainable energy; 34 on ecology; and 26 papers covering environmental pollution and protection. Offering an overview of the most up-to-date findings and technologies in the field of sustainable energy and environmental protection, the book will be of interest to all those working in this field.
