Multicultural Child Care Paul Vedder 1996 "What is the state of multicultural education in child care centres in Western European countries? What should multicultural education in these centres look like? These are the two key questions addressed in this book. In this study the authors have analysed the state of multicultural education in child care centres in the Netherlands, England, Scotland, Denmark, Sweden, Germany, Belgium, France and Spain. The main situation considered here is the Netherlands where the recent and rapid growth of the number of child care centres, together with the growing numbers of immigrant children visiting these centres, have given a strong impetus to concerns about the quality of centre education from a multicultural perspective." "For centre staff, sensitive responses towards children and parents, as well as parental involvement, have become essential for managing cultural diversity in a way beneficial for both migrant and indigenous families. It is argued that defining and improving the quality of centre education from a multicultural perspective require discussions between staff and parents about educational goals and the means to achieve them. The book gives recommendations for improving the relationship between staff and parents by way of consensus building about these aims."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. International Perspectives on Early Years Workforce Development

Verity Campbell-Barr 2025-02-28 This up to date text is suitable for students on all early years and early childhood courses as well as interested practitioners. It looks at the current structure of the early childhood education and care (ECEC) workforce in different countries, each of which represents a distinct philosophical tradition, tracing what has shaped this structure and examining how politics and policy have moulded the workforce over time. Each chapter analyses historical, philosophical and political developments in the respective country and looks at key theorists, the concepts of childhood that have shaped the workforce and the pedagogical approach. The unique aspects of each country are highlighted along with a consideration of what the future might hold for the workforce. Students and practitioners will achieve a more critical understanding of current practice and the beliefs which underpin particular pedagogical approaches while being encouraged to question their own values and practice.
