Calculus for The Life Sciences Sebastian J. Schreiber 2017-10-09 In this much anticipated Calculus for Life Sciences, Binder Ready Version, the authors present the basic canons of first-year calculus, but motivated through real biological problems. The two main goals of the text are to provide students with a thorough grounding in calculus concepts and applications, analytical techniques, and numerical methods and to have students understand how, when, and why calculus can be used to model biological phenomena. Both students and instructors will find the book to be a gateway to the exciting interface of mathematics and biology. This text is an unbound, binder-ready edition.

Handbook of Computational and Numerical Methods in Finance Svetlozar T. Rachev 2011-06-28 Numerical Methods in Finance have recently emerged as a new discipline at the intersection of probability theory, finance and numerical analysis. They bridge the gap between financial theory and computational practice and provide solutions to problems where analytical methods are often non-applicable. Numerical methods are more and more used in several topics of financial analysis: computation of complex derivatives; market, credit and operational risk assessment, asset liability management, optimal portfolio theory, financial econometrics and others. Although numerical methods in finance have been studied intensively in recent years, many theoretical and practical financial aspects have yet to be explored. This volume presents current research focusing on various numerical methods in finance. The contributions cover methodological issues. Genetic Algorithms, Neural Networks, Monte-Carlo methods, Finite Difference Methods, Stochastic Portfolio Optimization as well as the application of other numerical methods in finance and risk management. As editor, I am grateful to the contributors for their fruitful collaboration. I would particularly like to thank Stefan Trueck and Carlo Marinelli for the excellent editorial assistance received over the progress of this project. Thomas Plum did a splendid word-processing job in preparing the manuscript. I owe much to George Anastassiou (Consultant Editor, Birkhauser) and Ann Kostant Executive Editor, Mathematics and Physics, Birkhauser for their help and encouragement.
