Writing and Learning in the
Science Classroom Carolyn S.
Wallace 2004-03-31 This
volume is of interest to science
educators, graduate students,
and classroom teachers. The
book will also be an important
addition to any scholarly
library focusing on science
education, science literacy, and
writing. This book is unique in
that it synthesizes the research
of the three leading
researchers in the field of
writing to learn science:

Carolyn S. Wallace, Brian
Hand, and Vaughan Prain. It
includes a comprehensive
review of salient literature in
the field, detailed reports of
the authors' own research
studies, and current and future
issues on writing in science.
The book is the first to
definitely answer the question,
"Does writing improve science
learning?". Further, it provides
evidence for some of the
mechanisms through which
learning occurs. It combines
both theory and practice in a
unique way. Although primarily
a tool for research, classroom
teachers will also find many
practical suggestions for using
writing in the science
classroom.
