Numeri in movimento Michela Maschietto

2014-09-01 La protagonista di questo libro è la macchina aritmetica Zero+1, chiamata anche pascalina poiché evoca la macchina matematica inventata da Blaise Pascal nel Seicento, che costituisce una formidabile risorsa per alimentare, arricchire e stimolare il lavoro didattico d'aula. Essa permette infatti di pensare in modo diverso l'insegnamento e l'apprendimento di significati chiave nel curriculum di matematica: la scrittura dei numeri nel sistema posizionale decimale, la ricorsività e gli algoritmi delle operazioni. Il volume si articola in due parti. La prima è dedicata alla presentazione della pascalina Zero+1 — com'è fatta, quali saperi mette in gioco, come funziona — e della metodologia didattica con artefatti nel laboratorio di matematica, inteso come luogo e spazio «ideale» per la mente, in cui si procede

per tentativi ed errori, in cui si riflette, in cui avviene il confronto per apprendere. Questa parte propone anche alcuni approfondimenti di carattere sia storico sia didattico. La seconda parte contiene cinque percorsi laboratoriali strutturati in progressione da svolgere in classe, composti ciascuno di una guida per l'insegnante e schede operative per gli allievi. Le proposte didattiche derivano da numerose sperimentazioni condotte in diverse scuole da insegnanti appartenenti ai gruppi di ricerca in didattica della matematica dell'Università di Modena e Reggio Emilia e dell'Università di Torino e sono utilizzabili dalla fine della classe prima primaria fino alla classe quarta primaria. Coping Power nella scuola secondaria Iacopo

Bertacchi 2020-04-07 Progetto di prevenzione e intervento sulle problematiche di condotta in alunni di età preadolescenziale. Il volume desidera, inoltre, favorire le dinamiche prosociali in ambiente scolastico ed extrascolastico. Dopo un'introduzione teorica sul programma Coping Power Scuola e sulla sua applicazione, vengono presentati i sette moduli di cui è composto il percorso didattico, percorso che si articola lungo l'intero anno scolastico, e una serie di schede operative e spunti di riflessione da elaborare in classe, individualmente o in piccoli gruppi. A ciascun modulo corrispondono uno o più capitoli della storia illustrata Siamo un gruppo, in allegato, in cui sono narrate le vicende di cinque ragazzi di una scuola secondaria di primo grado che decidono di creare un gruppo musicale e partecipare a un concerto scolastico. I compagni dovranno però affrontare assieme e superare, con non poche difficoltà, paure, emozioni contrastanti e pregiudizi. Coping Power II

Coping Power nasce come un modello di intervento cognitivo-comportamentale evidence-based sviluppato per bambini con problemi di aggressività e per i bambini con diagnosi di disturbo oppositivo provocatorio e disturbo della condotta. Il Coping Power oggi può essere applicato in contesti svantaggiati, in setting di gruppo o individuale, aggiungendo un breve intervento di prevenzione universale, integrando al suo interno un supporto via Web per genitori e figli. La storia Siamo un gruppo La storia, attraverso le vicende dei cinque ragazzi, affronta tutte le tematiche del programma e consente di lavorare sulle varie abilità emotivo-relazionali trattate nei diversi moduli e sulla costruzione del gruppo classe. La storia è stata ideata con la finalità di unire come un filo conduttore tutti gli argomenti del programma, suscitando interesse e curiosità nei ragazzi. I contenuti della storia offrono spunti di riflessione e approfondimento all'interno della classe, nonché stimoli per mettere in atto attività esperienziali. Gli episodi

e le vicende narrate sono state costruite in modo da poter essere rielaborate in classe attraverso discussioni, role play, esercitazioni oppure attraverso varie attività che richiedono di immaginare il proseguo della storia, di produrre nuovi testi e aggiungere altri contenuti alla storia. In sintesi Il programma è stato elaborato in modo da integrarsi nelle attività didattiche quotidiane, con momenti di confronto e condivisione gestiti dagli stessi alunni e di riflessione metacognitiva sulle esperienze personali.

Coping Power nella scuola primaria Iacopo Bertacchi 2020-04-07 Un percorso per educare a gestire le emozioni e le relazioni sociali, al fine di ridurre e contenere i comportamenti problematici. Coping Power Il Coping Power nasce come un modello di intervento cognitivo-comportamentale evidence-based, sviluppato per bambini e preadolescenti con problemi di aggressività e per bambini con diagnosi di disturbo oppositivo provocatorio e disturbo della

condotta, contemporaneamente permette di stimolare le abilità prosociali e cooperative. Il programma Coping Power Scuola Il Coping Power Scuola è stato progettato per u utilizzo concreto nelle classi di scuola primaria. L'intervento rientra durante l'orario delle lezioni, come parte di una tipica giornata scolastica e viene utilizzato per ridurre i comportamenti dirompenti e aggressivi e migliorare il funzionamento sociale anche per mezzo del clima collaborativo e cooperativo che si instaura tra i bambini. Oggi il modello Coping Power Scuola consiste in un percorso strutturato, inserito e integrato nella didattica quotidiana, che consente di potenziare nei bambini e preadolescenti le abilità emotivo-relazionali e di gestione della rabbia mentre si svolge il programma didattico curricolare. In sintesi Coping Power nella scuola primaria è stato ideato e strutturato per inserirsi perfettamente nella pratica didattica quotidiana della scuola primaria, offrendo continuamente spunti per

connessioni interdisciplinari.
