**Applied Linguistics and**

**Materials Development** Brian

Tomlinson 2012-12-06 Focuses

for the first time on materials

development and applications

of current research and theory

for the main areas of applied

linguistics (e.g. second

language acquisition,

pragmatics, vocabulary

studies). There are many books on applied linguistic theory and research and there are now a number of books on the principled development of materials for language learning, but this book takes a new approach by connecting the two concerns. Each of its chapters first of all presents relevant theories and research conclusions for its area and then considers practical applications for materials development. The chapters achieve these applications by reporting and commenting on current theory and research, by analysing the match between current published materials and current theory and by suggesting and exemplifying applications of current theory to materials development. This will be an essential resource both for those studying or teaching materials development and for those studying or teaching applied linguistics.

*SLA Research and Materials Development for Language Learning* Brian Tomlinson 2016-05-20 SLA Research and Materials Development for Language Learning is the only book available to focus on the interaction between second language acquisition theory and materials development for language learning. It consists of contributions written by experts in SLA, experts in materials development, researchers who have expertise in both fields, and introductions and conclusions by the editor. The book is organized into four major sections - position statements; materials driven by SLA theory; evaluations of materials in relation to SLA theory; and proposals for action - that offer a diverse range of perspectives while maintaining a cohesive and comprehensive overview on the subject. This book is ideal for post-graduate courses in applied linguistics and second language acquisition and for researchers interested in the relationship between SLA and materials

development.
