NL ARMS Netherlands Annual Review of Military Studies 2021 Robert Beeres 2021-09-20 This is open access volume of the NL ARMS offers an interdisciplinary view on the domain of Compliance and Integrity in International Military Trade (CIIMT), integrating defence economics, international law, arms export control frameworks and policies, information management, organizational sciences and ethics. Although, in academia, and from an interdisciplinary perspective, CIIMT constitutes a relatively novel research domain, across private and public defence-related sectors, the subject evokes high levels of attention and interest, instigating a need for critical thinking, reflection and creativity to address ensuing multi-faceted issues and problems. The Faculty of Military Sciences at the Netherlands Defence Academy extends an in-house MSc programme on CIIMT, which, by integrating practice-based and scientific-based knowledge, aims to contribute to this need. The MSc programme on CIIMT is concerned with exploring, analysing, understanding, explaining, controlling and improving the military dimension in international military trade. More particularly, CIIMT studies managerial questions regarding strategic trade control of military and dual-use goods and services. CIIMT ties in with the Netherlands Defence Academy's vision on scientific education, embedded in the reflective practitioners' paradigm uniting both management and leadership skills needed to decide and operate in high-tension and high-risk knowledge intensive environments. The Faculty of Military Sciences uses the reflective practitioners' paradigm to refer to critical thinking, reflection and Bildung that characterize its thinking doers, the so-called Thinking Soldiers, either at the academic Bachelor's or Master's level. In view of the complexity of the international trade regarding military and dual-use goods and services, the rapid evolvement of strategic trade control and frameworks, and its importance to procurement processes, defence organizations require innovative thinking doers, who, based on an in-depth understanding, from an interdisciplinary perspective can be expected to find - and take responsibility for - creative solutions to problems. NL ARMS 2021 comprises, amongst others, contributions from students and lecturers partaking in this programme. All the editors are affiliated with the Faculty of Military Sciences of the Netherlands Defence Academy in Breda, The Netherlands.

The Future of University Education Michał Izak 2017-04-26 This collected volume of essays offers glimpses of the future of university education. While universities consider the spirit of theoretical exchange and intellectual pursuit to be a defining trait of their identity, this book argues that this heritage is disappearing under the influence of the short-term demands of societies and markets. Universities used to be sites of dissent, civil courage and societal conscience, but have now instead become little more than pseudo-businesses, rendering them incapable of remaining critical or independent. However, with more people going to university every year, there is a strong resistance to the notion that the university as a collegial and critical institution is dead, among academics as well as the broader public. With contributions from scholars across the world, this edited collection explores the ramifications of marketization on universities, and provides glimpses of what higher education will look like in the future. It will be of great interest to teachers and students in higher education, as well as policy makers and those interested in the current and future state of higher education.

Global Sport Management Education Mike Rayner 2023-09-11

Drawing on original and innovative research from around the world, this book explores issues and opportunities relating to internationalising sport management curriculum. It explains how to design and implement an international curriculum, and therefore how to better equip graduates for work in an increasingly global sport business environment. This book provides an in-depth understanding of the role educational developers can play in the internationalisation of higher education and in the provision of an internationalised learning experience for all students studying sport management around the globe. It introduces the core principles of the internationalisation of sport management education and how to apply those in teaching and learning on university courses, including the provision of study abroad programmes that improve interpersonal and communication skills, adaptability and self-confidence. Adopting a values-driven approach that puts global citizenship, cultural capital and international diversity at the heart of good programme design, this book touches on key issues in contemporary higher education, including employability, student support, inclusivity and equity, building influential learning communities and co-creation in teaching and learning. This is an invaluable resource for instructors, lecturers, course leaders, university administrators and policy makers with an interest in sport-related studies or the development of higher education.

The Routledge Companion to International Management

Education Denise Tsang 2013-06-19 Crises and scandals in the world of international management have brought a new spotlight onto how the subject is taught, studied and understood. There has been a plethora of literature on international management, but a lack of focus on how international management education (IME) can be shaped to respond to existing and future global business challenges. The Routledge Companion to International Management Education gathers together contributors from academia, industry and university administration involved in IME, to: introduce the domain of IME; describe the emerging state in new geographical areas; discuss the major issues and debates revolving around IME; explore the linkage of technology and international management, and shed light on the future of IME. The diverse background of the contributors provides a global perspective that challenges the dominant Anglo-American view, with up-to-date specific insights originating from their indigenous view points, which has often been neglected and inadequately covered. The volume answers important questions, such as: Do we need a vision in IME? What is the current state of IME? How has IME grown in emerging market segments? What roles does technology play in its recent development? The volume provides thought-provoking reading for educators, administrators, policy makers, human resources professionals and researchers. It will also give future international management students a glimpse of IME from a global inside-out perspective.

Implementing Sustainability in the Curriculum of Universities Walter Leal Filho 2017-11-17 This book presents sustainable development themes across universities and introduces methodological approaches and projects to the teaching staff. It has been prepared against this background, to identify ways to better teach about sustainability issues in a university context. It contains a set of papers presented at a Symposium with the same title, held at Manchester Metropolitan University (UK) in March 2017. The event was attended by a number of institutions of higher education active in this field. It involved researchers in the field of sustainable development in the widest sense, from business and economics, to arts and fashion, administration, environment, languages and media studies. Sustainability is seldom systematically embedded in the curriculum at higher education institutions. Yet, proper provisions for curricular integration of sustainability issues as part of teaching programmes across universities are an important element towards curriculum greening. The aims of this book are: (i) to provide teaching staff at universities active and/or interested in teaching sustainable development themes with an opportunity to document and disseminate their works (i.e. curriculum innovation, empirical work, activities, case studies practical projects); (ii) to promote information, ideas and experiences acquired in the execution of teaching courses, especially successful initiatives and good practice; (iii) to introduce methodological approaches and projects which aim to offer a better understanding of how matters related to sustainable development can be tackled in university teaching. Last but not least, a further aim of this book, prepared by the Inter-University Sustainable Development Research Programme (IUSDRP) and the World Sustainable Development Research and Transfer Centre (WSD-RTC), is to catalyse a debate on the need to promote sustainable development teaching today.

The Routledge Handbook of Comparative Economic Systems Bruno Dallago 2022-12-19 The Routledge Handbook of Comparative Economic Systems examines the institutional bases of economies, and the different ways in which economic activity can function, be organized and governed. It examines the complexity of this academic and research field, assessing the place of comparative economic studies within economics, paying due attention to future perspectives, and presenting critically important questions, analytical methods and relative approaches. This complements the recent revival of the systemic view of economic governance, which was accelerated by the COVID-19 pandemic and likely even more the renewed East-West clash epitomized by the Russian invasion of Ukraine and the West's reaction to it. The Handbook is divided into five parts. Each part deals with an issue of relevance for the discipline. The first and second parts look at the subject, content and approach of the discipline and its comparative method. The third part looks at the idiosyncratic nature of different economic systems and their constituent elements. The fourth part considers the outcomes that different economic systems generate and how these outcomes change following the evolution and transformation of economic systems. The last part takes stock and looks ahead at the challenges, from a theoretical and applied perspective, and the exogenous and endogenous factors promoting the advancement of the discipline, including the interaction between and competition among varied approaches and opposing paradigms. The Handbook brings together leading international contributors to reflect on the relevant debates and case or country studies, provides a balanced overview of the results achieved and current knowledge, as well as evolving issues and new fields of research. The

book provides researchers, students and analysts with a complete, critical and forward-looking presentation and analysis of the content, development, challenges and perspectives of comparative economic studies. Chapters 4 and 22 of this book are available for free in PDF format as Open Access from the individual product page at www.routledge.com.
