Technological Systems in the Bio Industries B. Carlsson 2012-12-06

Technological Systems in the Bio Industries: An International Study represents a comprehensive, interdisciplinary, and systematic effort to understand the nature and role of technological change in a rapidly evolving arena of economic activity that can be loosely referred to as the bio industries. These include biomedical industries that deliver goods and services used in health care, including those based on genetic engineering, as well as applications of biotechnology in other industries such as agriculture, food production, and the forest industries. This volume is the third in a continuing series of studies on technological systems; it seeks to identify and address new sets of conceptual and methodological issues in analyzing innovation systems, particularly as regards the delimitation of relevant systems. The book makes an in-depth comparison of the biomedical clusters in Sweden and Ohio. It also sheds light on the emergence of new science-based technological systems.

Business Model Innovation Allan Afuah 2014-03-26 Rooted in strategic

management research, *Business Model Innovation* explores the concepts, tools, and techniques that enable organizations to gain and/or maintain a competitive advantage in the face of technological innovation, globalization, and an increasingly knowledge-intensive economy. The book investigates how organizations can use innovations in business models to take advantage of entrepreneurial opportunities from:

- Crowdsourcing and open innovation
- Long Tails
- Social media
- Disruptive technologies
- Less-is-more innovations
- Network effects
- Scarcity of complementary capabilities

The book also looks at the ways firms can use innovations in business models to exploit or defend against threats.
