

The Global Startup Ecosystem Ranking 2015

Startup Ecosystems Fabio Greco 2023 This book analyzes the components of the startup ecosystem, including the characteristics that can favor or disadvantage the development of new innovative ventures. The author believes it is essential to identify crucial variables of start-up ecosystems that have a context-specific influence on the well-being and development of startups. In this regard, the book analyzes the concept of the start-up ecosystem both from the point of view of scholars and professionals. The author then deals with the diverse approaches to studying startup ecosystems, which have over the years become increasingly complex, and less linear, making systematization indispensable. The author provides therefore a classification with a transversal logic with respect to this diversity of contributions in the literature. The main theoretical contributions to start-up ecosystems are grouped according to the attention they place on three different variables: territorial contexts, resources, and actors. The author also presents qualitative, interview-based, research using narrative analysis mode to understand the three variables. The work provides, on the one hand, the proposal of a framework as a theoretical interpretative model useful both for the description of the fundamental components of the start-up ecosystem, and also useful for giving a boost to future research. On the other hand, the book also presents evidence of a practical nature useful to support and guide the choices of startup founders and of managers of companies and institutions that orbit within start-up ecosystems.

Development Centre Studies Start-up Latin America 2016 Building an Innovative Future OECD 2016-10-20 Start-up Latin America 2016 presents an update of start-up promotion policies in the region. Start-ups are becoming a reality in Latin America and public policies are playing an important role in supporting their creation and expansion. Innovation and entrepreneurship. Theory and Practice Marcin Lis 2020-06-30 In recent years, there has been a growing awareness that innovation plays the key role in the success and the functioning of organizations. This publication reveals an interdisciplinary dimension, because it addresses the increasing need for sustainable innovation that combines economic, environmental and social elements. Its aim is to present the international exchange of ideas, research results and practical experience in the field broadly understood as innovation, to highlight the importance of innovation management in a competitive, global economy, and to discuss the current problems related to innovation and entrepreneurship. In the economy reliant on innovation of various organizations, cross-sectoral co-operation is of paramount importance. It allows to achieve synergy between entities with diverse resources and competences in generating innovative projects. Originally, analysis of cross-sectoral relations focused on building links between business and science - in particular, the realms of research and development. This is the most obvious system by means of which the economy is fed with innovative concepts and their implementation solutions. Over time, the public sector too has begun to be perceived not only as an entity that creates economic

regulations, but also as a real partner in the process of shaping economic development: it provides innovative projects, which are then commercialised in business. Therefore, the role of the public sector is not only to legislate, but also to conduct joint actions with the innovative business sector in order to stimulate local development of innovative projects. This publication will address the so-called triple helix (the most effective process of generating innovation): the system of co-operation between business, science, and government that contributes to the creation of innovative economy.

Which Factors Determine the Success Or Failure of Startup Companies? A Startup Ecosystem Analysis of Hungary, Germany and the US Christoph Kotsch 2017-09 As more and more startup companies are founded every year worldwide, building up one's own business does not get easier. Since 9 out of 10 startups fail, future entrepreneurs are well advised to take a look at potential reasons for failure and success. Learning from others' mistakes and studying success stories can improve their own performance and help to avoid critical errors. The academic paper at hand will provide valuable insights for entrepreneurs. It not only states the most important terms concerning startups but also lists the most important factors for a startup company's success, according to literature review. Delineating both internal and external factors, this thesis not only delivers a synoptic view of potential challenges inside a startup as well as in its ecosystem, but also juxtaposes these influences in opposition. The second part of this paper analyzes a series of interviews with twelve startup founders from three different regions (the province of North-Rhine Westphalia in Germany, Budapest in Hungary and the state of California in the US). Their views and experiences will be summarized and put into the context of their respective startup ecosystem.

Erfolg und Misserfolg von Start-Ups. Unternehmensgründung in Deutschland Till Burschel 2019-04-02 Masterarbeit aus dem Jahr 2018 im Fachbereich BWL - Unternehmensgründung, Start-ups, Businesspläne, Note: 1,7, SRH Hochschule Heidelberg, Sprache: Deutsch, Abstract: Diese Arbeit untersucht, warum Personen imstande sind, erfolgreich ein Unternehmen zu gründen sowie am Markt zu halten und dies anderen nicht gelingt. Zu Beginn einer Unternehmensgründung steht für den Entrepreneur selbst und mögliche Kapitalgeber die Frage, ob die Gründung erfolgreich und der Erfolg steuerbar sein wird. Auch interessiert es Personen im externen Umfeld, ob die Idee markttauglich und realisierbar sowie die Gründerperson dafür überhaupt geeignet ist. Im Jahr 2017 wurden in Deutschland seitens des Statistischen Bundesamtes 676.977 Gewerbeanmeldungen registriert. In dieser Zahl sind sämtliche neu gegründeten Unternehmen berücksichtigt. Im Vergleich zu den Vorjahren 2016 und 2015 bedeutet dies einen Rückgang von 1,2 Prozent bzw. 4,2 Prozent. Die Zahl der Gewerbeanmeldung allein sagt noch nichts über die Erfolgsquote neugegründeter Unternehmen aus. Unter Erfolgsquote sind diejenigen neugegründeten Unternehmen zu verstehen, denen nicht nur der Markteintritt gelungen ist, sondern die sich in dem jeweiligen Markt langfristig etablieren konnten. Demgegenüber stehen pro Jahr durchschnittlich 30.700 Insolvenzverfahren von Unternehmen in der Bundesrepublik Deutschland (BRD) bezogen auf den Zeitraum von 1999 bis 2015. Die Zahl der Insolvenzverfahren ermöglicht es nicht, eine konkrete Aussage über den Kapitalumfang dieser Unternehmen oder das Ausmaß des entstandenen volkswirtschaftlichen Schadens insgesamt zu treffen. Allein die Höhe der Gläubigerforderungen gegenüber den betreffenden Unternehmen schwankte in der Zeit von 1999 und 2015 jährlich zwischen 15,7 und 51,7 Milliarden Euro. Zudem waren von den Unternehmensschließungen die Arbeitsplätze von durchschnittlich 428.000 Mitarbeitern pro Jahr betroffen.

Global Business Mahesh Joshi 2018-08-02 In the wake of the Brexit vote and the election of Donald Trump, globalization has found itself increasingly under the microscope. An active international discussion is underway, and the ideological viewpoint that the reversal of globalization and a return to protectionism and isolation will cure the world's ills is touted by many. In the midst of the growing prominence of

international interconnectivity and contradicting attention attained by skewed misinformation about global impact, *Global Business* is a straightforward commentary on mega trends in globalization. With insights and observations from academics, practitioners, and practical thinkers from around the world *Global Business* demystifies the economic, social, and cultural impacts of globalism and globalization, and presents a balanced explanation of what is happening and how it affects everyone. It highlights that technology and change are not new, and explores the path taken to reach our current interconnected global state. It encourages a realistic examination of where we are and invites a dialogue on where we can go together.

Startup Cities Peter S. Cohan 2018-02-07 This book offers a comprehensive model for explaining the success and failure of cities in nurturing startups, presents detailed case studies of how participants in that model help or hinder startup activity, and shows how to apply these lessons to boost local startup activity. *Startup Cities* explains the factors that determine local startup success based on a detailed comparison of regional startup cities—pairing the most successful and less successful cities within regions along with insights and implications from case studies of each of the model's elements. The book compares local city pairs, highlighting factors that distinguish successful from less successful cities and presents implications for stakeholders that arise from these principles. Peter Cohan is a lecturer of Strategy at Babson College and one of the world's leading authorities on regional startup ecosystems. Starting in 2012, he created and led Startup Strategy courses that explore four regional startup ecosystems—Hong Kong/Singapore, Israel, Paris, and Spain/Portugal. These courses are based on an original framework for evaluating why a few cities host most startup creation and the rest fail to do so. In running these courses, Peter has built a network of local policymakers, investors, entrepreneurs, and professors from which he draws practical insights for what distinguishes successful Startup Commons from their peers. The book provides vital benefits to these stakeholders. What You'll Learn Local policymakers will know how to build a local team to set objectives for their local Startup Commons and develop a comprehensive strategy to realize those goals Entrepreneurs will know how to choose where to locate their startups based on factors such as the supply and quality of talent—from chief marketing and technology officers to coders and sales people; quality of life, access to capital, customers, and mentors; and costs such as salary and real estate expense University administrators and faculty will know how to take research out of their labs and house it in companies that can commercialize that research, create academic programs that will encourage more entrepreneurship among their students, and connect with local policymakers and capital providers to spur local startup activity Capital providers will know how to scout out emerging startup cities where they can get access to the best investment opportunities at more favorable valuations and have greater influence on how the local startup scene evolves Who This Book Is For All key startup stakeholders, including local policymakers (mayors, directors of economic development, treasurers, controllers, presidents of regional chamber of commerce), entrepreneurs (CEOs, chief marketing officers, chief financial officers, chief HR officers, chief technology officers), universities (presidents; deans of faculty; provosts; professors of finance, management, and entrepreneurship; directors of international education), and capital providers (venture capital partners and associates, angel investors, bank loan officers, managers of accelerator operations)

World Shapers of Tomorrow Stefan Steiner 2021-03 World shapers of tomorrow: Startups building our future shows the impact of the TOP 100 Swiss Startups over the last 10 years. On 100 pages, the publication features the facts and figures about the startup ecosystem in Switzerland, shows the sectors and geographic distribution, and lists the investors behind Swiss deeptech startups. The book also highlights disruptive companies that changed their industry: Beekeeper, Bestmile, Climeworks, Covagen, DeinDeal, Doodle, GetYourGuide, MindMaze, Scandit, and Piavita. The founders of these startups share anecdotes and discuss their successes, lessons learned, and visions for the future. A selection of 10 verticals illustrates how Swiss deeptech startups transform our lives and help us build a better and more sustainable future in relation to health, longevity, digitalization, and decentralization. What do all the companies in the book have in common? They are all world shapers of tomorrow and have been selected by a jury of 100 investors as the TOP 100 Swiss Startups in the last decade. World shapers of tomorrow: Startups building our future shows is an informative and entertaining read not only for startup experts.

Routledge Handbook of Banking and Finance in Asia Ulrich Volz 2018-10-26 The Routledge Handbook

of Banking and Finance in Asia brings together leading scholars, policymakers, and practitioners to provide a comprehensive and cutting-edge guide to Asia's financial institutions, markets, and systems. Part I provides a country-by-country overview of banking and finance in East, Southeast, and South Asia, including examples from China, Japan, Hong Kong, India, and Singapore. Part II contains thematic chapters, covering topics such as commercial banking, development banking, infrastructure finance, stock markets, insurance, and sovereign wealth funds. It also includes examinations of banking regulation and supervision, and analyses of macroprudential regulation, capital flow management measures, and monetary policy. Finally, it provides new insights into topical issues such as SME, green, and Islamic finance. This handbook is an essential resource for scholars and students of Asian economics and finance and for professionals working in financial markets in Asia.

Smart World Cities in the 21st Century Agnes Mainka 2018-08-06 The term smart city has become a buzzword. City planners develop ubiquitous connectivity through Wi-Fi hotspots, establish science parks, introduce bike and car sharing, and push entrepreneurship. All this is happening under the flagship of becoming a knowledge city. This book investigates the digital and cognitive infrastructure of 31 cities and how they meet the demands of the knowledge society in an increasingly digitized environment.

Move Over, Silicon Valley Steve Hendershot 2015 Silicon Valley has been synonymous with technological innovation for decades. The northern California, USA enclave has nurtured a project culture that makes it relatively easy for startup companies to succeed: Team leaders can find top-flight talent, and budding entrepreneurs can seek guidance from seasoned executives about growth strategies and project hurdles. But Silicon Valley is now just one of many tech project hot spots, as cities around the world try to capture a little of California's energy. The world's top 10 "startup ecosystems," according to research firm Compass and its 2015 Global Startup Ecosystem Ranking, now include Tel Aviv, Israel; London, England and Singapore.
