*Consumer Behavior* Rajagopal 2010 Book & CD.

This book examines how consumer behaviour is influenced in emerging markets by the marketing strategies of global firms and analyses its impact on market, culture and consumption that contribute to the broader socio-economic development, values and lifestyle of consumers around. The discussions in the book analyse behaviour of consumers as individuals, decision makers, players in subcultures, and corporate associates in business performance of global firms.

Discussions in this book delineate behavioural and relational factors of consumers in emerging markets that affect overall business performance of global firms. Strategies on building customer life time value, customer relationship management, and bottom of the pyramid consumer strategies to assure the high business performance of manufacturing, retailing and services sectors have also been analysed in the book. Managerial applications of consumer behaviour are also discussed in each chapter emphasising consumer behaviour concepts which can be employed to develop managerial strategy by the firms.

Advertising Creative Tom Altstiel 2019-01-18 Advertising Creative, Fifth Edition continues to weave discussions about digital messaging through every chapter. Yet, the underlying theme is still about one thing that never changes—the need for fresh concepts and big ideas in pursuit of the One Thing. This edition introduces a new co-author, Marcel Jennings, who brings a fresh perspective from his background as a copywriter and creative director, as well as teaching at Virginia Commonwealth University. As always, the authors draw upon their experiences as working advertising professionals and teachers to get right to the point, stressing key principles and practical information that students and working professionals can use to communicate more effectively to build memorable brands. They also address some of the key issues impacting our

industry today, such as gender equality, diversity in the workplace, and business ethics.

**Communication Power** Manuel Castells 2013-08-29 We live in the midst of a revolution in communication technologies that affects the way in which people feel, think, and behave. The media have become the space where power strategies are played out. In the current technological context mass communication goes beyond traditional media and includes the Internet and mobile communication. In this wide-ranging and powerful book, Manuel Castells analyses the transformation of the global media industry by this revolution in communication technologies. He argues that a new communication system, mass self-communication, has emerged, and power relationships have been profoundly modified by the emergence of this new communication environment. Created in the commons of the Internet this communication can be locally based, but globally connected. It is built through messaging, social networks sites, and blogging, and is now being used by the millions around the world who have access to the Internet. Drawing on a wide range of social and psychological theories, Castells presents original research on political processes and social movements. He applies this analysis to numerous recent events--the misinformation of the American public on the Iraq War, the global environmental movement to prevent climate change, the control of information in China and Russia, Barak Obama's internet-based presidential campaigns, and (in

this new edition) responses to recent political and economic crises such as the Arab Spring and the Occupy movement. On the basis of these case studies he proposes a new theory of power in the information age based on the management of communication networks. Justly celebrated for his analysis of the network society, Castells here builds on that work, offering a well grounded and immensely challenging picture of communication and power in the 21st century. This is a book for anyone who wants to understand the dynamics and character of the modern world.

### **The Role of Agriculture in Climate Change**

**Mitigation** Lucjan Pawlowski 2020-05-07

According to IPCC reports, one of the greatest threats to the Earth ecosystems is climate change caused by the anthropogenic emissions of greenhouse gases, mostly carbon dioxide, mainly from the combustion of fossil fuels, cement production and land-use change which leads to an excessive temperature rise.

Agriculture and forestry are responsible for quiet big emissions of greenhouse gases: CO<sub>2</sub>, CH<sub>4</sub> and N<sub>2</sub>O, and have significant potential to reduce these emissions mainly through enhancement of CO<sub>2</sub> absorption by terrestrial ecosystems. To evaluate the impact of agriculture on climate change, ruminant farming should be also taken into account. These animals emit considerable amounts of methane which has strong greenhouse effects. Methane emissions may be reduced by using appropriate feed for ruminants. Decreasing the meat consumption of these animals can also make an important contribution to reducing methane emissions. The methods for reducing greenhouse gas emissions through appropriate management of terrestrial ecosystems and animal husbandry are widely discussed in *The Role of Agriculture in Climate Change Mitigation*. The book will be of interest to academics, professionals and policy makers in environmental sciences.

*Adventure Tourism and Outdoor Activities Management* Ian Jenkins 2019-02-04 An essential resource for those wishing to

understand the key factors behind the operation of an adventure tourism company and how to be able to deliver a profitable as well as a sustainable product. It discusses important factors such as how the use of technologies and the current importance of environmental impacts and climate change are areas that are key to adventure tourism firms. To remain profitable companies need to address these issues along with the important elements of risk and safety. Created from the author's experience in delivering adventure tourism courses over the last 20 years, this long-awaited book is aimed at both university courses on adventure tourism and outdoor recreation as well as those working within the industry.
