[Essays in the memory of Imre Lakatos](#) Imre Lakatos 1976-10-31 The death of Imre Lakatos on February 2, 1974 was a personal and philosophical loss to the worldwide circle of his friends, colleagues and students. This volume reflects the range of his interests in mathematics, logic, politics and especially in the history and methodology of the sciences. Indeed, Lakatos was a man in search of rationality in all of its forms. He thought he had found it in the historical development of scientific knowledge, yet he also saw rationality endangered everywhere. To honor Lakatos is to honor his sharp and aggressive criticism as well as his humane warmth and his quick wit. He was a person to love and to struggle with. PAUL K. FEYERABEND ROBERT S. *The Raven's Hat* Jonas Peters 2021-02-02 Try to solve a series of unusual math games in this playful, illustrated guide that breaks down important math concepts for everyday adult readers. "A wonderful book for someone who likes mathematics and likes to be challenged!" —Chris Bernhardt, author of *Quantum Computing for Everyone* This book presents a series of engaging math games that seem unsolvable—but can be solved when they are translated into mathematical terms. How can players find their ID cards when the cards are distributed randomly among twenty boxes? By applying the theory of permutations. How can a player guess the color of her own hat when she can only see other players' hats? Hamming codes, which are used in communication technologies. Like magic, mathematics solves the apparently unsolvable. Featuring a wide range of mathematics, these games allow anyone, including university students and anyone with high school-level math, to experience the joy of mathematical discovery.
