School-Museum Relationships and Teaching Social Sciences in Formal Education

Escribano-Miralles, Ainoa 2022-06-03 Coverage of heritage and archeology in formal education is typically limited. These subjects are typically taught through specific and anecdotal activities that do not respond to a specific methodological foundation. School-museum relationships offer numerous benefits for design participation experiences with long-term perspectives in conducting systematic activities. The collaboration between the museum and school should be considered a maxim for the development of teaching-learning processes of history based on the students' investigation of their own reality and the immediate context of a lived culture using the archaeological heritage. School-Museum Relationships and Teaching Social Sciences in Formal Education paves the way for collaboration between museums and

schools as a rule of conduct for the development of teaching and learning processes for the social sciences. This book focuses, from within the field of formal education, on the spaces in which learning takes place (school and archeological museums) to establish proposals for improvement in the teaching and learning of history, taking heritage education as a point of reference and heritage as a teaching resource. Covering topics such as interactive collaborative models, teaching and learning improvement, and the school-museum educational projects, this premier reference source is an excellent resource for museum educators, directors, educators and administrators of both K-12 and higher education, pre-service teachers, teacher educators, government officials, librarians, researchers, and academicians.

Patriarchy and Gender in Africa Veronica Fynn

Bruey 2021-03-25 This timely and expansive multidisciplinary and transdisciplinary collection dissects precolonial, colonial, and post-independence issues of male dominance, power, and control over the female body in the legal, socio-cultural, and political contexts in Africa. Contributors focus on the historical, theoretical, and empirical narratives of intersecting perspectives of gender and patriarchy in at least ten countries across the major sub-regions of the African continent. In these well-researched chapters, authors provide a deeper understanding of patriarchy and gender inequality in identifying misogyny, resisting male

supremacy, reforming discriminatory laws, embracing human-centered public policies, expanding academic scholarship on the continent, and more.

Research Anthology on Personal Finance and Improving Financial Literacy Management Association, Information Resources 2020-12-05

Developing personal financial skills and improving financial literacy are fundamental aspects for managing money and propelling a bright financial future. Considering life events and risks that unexpectedly present themselves, especially in the light of recent global events, there is often an uncertainty associated with financial standings in unsettled times. It is important to have personal finance management to prepare for times of crisis, and personal finance is something to be thought about in everyday life. The incorporation of financial literacy for individuals is essential for a decision-making process that could affect their financial future. Having a keen understanding of
