The Critique of Bioethical Principlism in Contrast to an African Approach to Bioethics Jude Thaddaeus Buyondo 2024-08-16 Though some argue that bioethics in the Black African world is simply a reflection of the Western approach to bioethics, this work suggests otherwise. While the Western approach (bioethical principlism) claims to offer an absolute approach to bioethics in a universalized common morality, this book argues that bioethical principlism can be complemented with African approaches to bioethics. Western principlism, as primarily presented by Thomas L. Beauchamp and James F. Childress, can hardly be incarnated in the African context of bioethical problems unless it is complemented by a contextual normative understanding of African social realities, realities that themselves must be enriched by bioethical principlism. Without claiming to offer the last word on intercultural bioethics or disputing which bioethical approaches deserve prioritization, the work interactively relies on ordinary moral experiences that are practically visible in lived social realities, as well as the community realities

surrounding Africans south of the Sahara. Prescriptively, in order to not simply promote life but to do so fully, the African ethical system supports an integral community life by continuously promoting the norm of solidarity, continued vitality, and the hierarchization of life within the corporate community, which the individual must not blindly follow but responsibly interact with, without her identity, freedom, and conscience being crushed.

State Fragility and State Building in Africa Dele Olowu 2015-10-19

This book describes the contrast between the strong economic growth and democratization that have occurred in Africa and its stalling political progress. It presents and discusses fragility as the phenomenon that has caused the state to remain weak and faltering and has led to at least one third of the continent's citizens living in fragile states. Following the examination of the drivers of fragility and the impact of fragility on citizens and neighbouring states, the book discusses capacity building approaches. This part shows how effective states can be built on the African continent, a process that would result in a change from state fragility to state resilience. It is based on lessons learnt from close studies of the nations where the state has been most developed in the region, in Eastern and Southern Africa. The book provides and responds to the most recent and up-to-date information on African development and uses insights of people who have lived and worked in the continent for most of their lives.
