## **Caribbean Tourism**

Chandana Jayawardena 2005  
"Worldwide, tourism has become one of the most pervasive industries affecting towns and cities and remoter communities. No less so for the Small Island Developing States of the Caribbean, for which tourism has undoubtedly been one of the fastest growing sectors of the economy. But tourism is equally, one of the most fragile industries, susceptible more than any other to competition in the global marketplace and to the effects of natural and man-made disasters. Hurricanes and harassment, crime and violence present daunting challenges. In this post 9/11

era however, the primary challenge for Caribbean States is to develop a sustainable, competitive tourism product. Caribbean Tourism: Visions, Missions and Challenges examines the various factors necessary to face that challenge by discussing: - The role of education and training in the development of the hospitality industry; - The Cruise factor cruise ship contribution to the industry; - Case studies of the performance of the 4 Caribbean Countries; - The performance of the regional airlines; - Lessons from another region; - Community-based tourism development; and - Marketing the destination. Balancing contributions from academics and industry experts, this volume, as part of a three-volume series on Caribbean Tourism, takes a multidisciplinary approach to developing sustainable Caribbean Tourism and

provides students in training, researchers, policymakers and industry players with a much needed tool for understanding the way forward for Caribbean Tourism. "

**Flying Off Course** Rigas

Doganis 2019-01-10 Aviation is one of the most widely talked about industries in the global economy and yet airlines continue to present an enigma. Between 2010 and 2018 the global airline industry experienced its longest period of sustained profitability; however, huge global profits hid a darker side. Many airlines made inadequate profits or serious losses while others collapsed entirely. This fifth edition of Flying Off Course explains why. Written by leading industry expert, Rigas Doganis, this book is an indispensable guide to the inner workings of this exciting industry. Providing a complete, practical introduction to the fundamentals of airline economics and marketing, it explores the structure of the market, the nature of airline

costs, issues around pricing and demand, and the latest developments in e-commerce. Vibrant examples are drawn from passenger, charter and freight airlines to provide a dynamic view of the entire industry. This completely updated edition also explores the sweeping changes that have affected airlines in recent years. It includes much new material on airline alliances, long-haul low-cost airlines, new pricing policies and ancillary revenues in order to present a compelling account of the current state of the airline industry. Offering a practical approach and peppered with real examples, this book will be valuable to anyone new to the airline industry as well as those wishing to gain a wider insight into its operations and economics. For undergraduate or postgraduate students in transport studies, tourism and business the book provides a unique insider's view into the workings of this exciting industry.

Aircraft Financing and Leasing:

Tools for Success in Aircraft

Acquisition and Management,

Second Edition provides

students and industry

professionals with unique

insights into the latest

developments in the

Commercial Aircraft and

Engine Leasing and Financing

industry that has grown into

one of the most distinctive and  
important industries globally.

This book offers a blend of  
academic and professional

views that make it educational

and relevant to the everyday

operations of the industry. It

can be used as a stand-alone

textbook as well as a

practitioner's guide. Given the

impact of the COVID-19 virus

on airlines around the world,

the industry has experienced

substantial changes since the

first edition was published.

This second edition is

thoroughly revised and

includes some new case studies

and an entirely new chapter on

Environmental Considerations  
with Respect to Aviation

Finance. Aircraft Financing and  
Leasing details the industry's

foundational concepts,

including aviation law and

regulation, airline credit

analysis, maintenance reserve

development, insurance,

transaction cost modeling, risk

management tools such as

asset and credit diversification,

and the art of lease

negotiations. Different types of

aircraft are explored,

highlighting their purposes, as

well as when and why airline

operators and investors choose

specific models over others. In

addition, the book covers

important factors such as

modeling financial returns for

leased aircraft and appraising

aircraft values. Users will find

this an ideal resource for

practitioners or as an

outstanding reference for

senior undergraduate and

graduate students. - Includes a

new chapter on Environmental

Considerations with Respect to

Aviation Finance as well as

updates throughout to reflect

changes in the industry,

particularly due to COVID-19 - Utilizes case studies in each chapter—real-life examples that will help the readers apply newly learned concepts to real problems of the industry - Highly illustrated with text boxes for examples and real-world applications; graphs, charts, tables, diagrams, flow charts, photos, maps; and examples of forms - Offers a blend of academic and professional views, making it suitable for both student and practitioner - Serves as an aircraft finance and leasing reference for those starting their careers, as well as for legal, investment, and other professionals

**Aerospace Engineering 2007**  
**Airline Microeconomics** Tony Webber 2022-07-25 This book presents readers with a technical tool-kit to understand the economics of airlines. It starts by covering the key language and glossary of the air travel business, which is necessary for graduates or first-time employees in aviation to understand the content of conversations, meetings,

presentations and internal aviation communications. It then breaks down the complexity of the demand side of the air travel business. The book then analyses revenue over two distinct time horizons, specifically the short and medium runs, recognising the fact that airlines operate to a fixed number of seats over a short horizon because of the way that they schedule services in advance of departure. By combining revenue and costs, the book then analyses airline profit, with a focus on the short run and medium run decision variables that maximise airline profit. The remainder of the book analyses various important topics in air transport economics, including competition in airline markets, key rules, regulations and taxes that affect the return on capital in aviation, the way that airlines form relationships, and the economics of the market for oil and jet fuel, among others.
