This is a new edition of the highly successful textbook which explores the use of the Roper, Logan and Tierney Model of Nursing in practice. It underpins nursing care for patients with a variety of health care problems. The main focus is on nursing adult patients in acute and community-based settings. Applying the RLT Model in Practice has been written to enable students and their

teachers in both Higher Education and clinical practice to explore the different dimensions of the model through a variety of case studies and exercises .The case studies can be viewed as 'triggers' for student problem-solving skills in using the Model. Many of the exercises are aimed at enabling readers to find evidence to support nursing activities. The authors have incorporated an international perspective throughout the text. Based on the most popular model used in general nursing care throughout the worldExplicitly demonstrates how the RLT model can be used to assess, plan, deliver and evaluate individualised nursing careApplies the RLT model in the context of today's health services and links it to clinical governance and the multi-disciplinary context of careUses a problem solving approach with extensive use of exercises and case studiesAttractive two-colour design using boxes, tables and summariesFully updated

throughout in line with changes in practice, developments in the evidence base, changes in the NHS e.g. modern matrons, Modernisation Agency etc More material on how to apply the model in an inter disciplinary context Updated infection control section More on discharge planning More material relating to primary care

Communication and Interpersonal Skills for Nurses Shirley Bach 2009 Good communication and interpersonal skills remain one

of the enduring and fundamental characteristics of high-quality nursing and midwifery practice. This is despite major developments in our knowledge of scientific, technological and pharmacological health treatments. However, because communication is viewed as an implicit part of everyday life, the skills required for effective communication and appropriate professional interactions are often overlooked. This book provides student nurses with the essential information on communication and interpersonal skills. It clearly explores the core concepts and evidence base and is practical and accessible, helping students to gain confidence in these skills.

Improving Employee Health and Well Being Ana Maria Rossi 2013-11-27 This book examines how to improve employee well-being by addressing workplace stress. It features research from over two dozen stress scholars, offering insights for

occupational health professionals and employees. The book highlights the importance of understanding occupational stressors and provides strategies to enhance worker well-being.

Placement Learning in Cancer & Palliative Care Nursing

Penny Howard 2012-10-12 Are you unsure about your cancer and palliative care placement? Do you need guidance on what to prepare to get the most out of your practice learning? Will you have the range of clinical skills to care for people with cancer? What learning opportunities will there be to meet your competencies? How can you maximise your learning during this placement? This book will help you with all these concerns. It will advise you on what to expect from the placement, what you can learn, how to link theory and practice, and how to make the most of your learning opportunities and meet your competencies. - Takes a logical, step-by-step approach to preparing for learning on a cancer and palliative care placement - Provides the principles of care,

treatment and management of someone with a cancer diagnosis, linking university-learned theory to clinical practice - Gives helpful evidence-based practice examples and resources to support placement learning - Identifies clinical skills that underpin care of an individual with cancer - Highlights potential learning opportunities and experiences available on a cancer and palliative care placement - Explains how to develop your clinical portfolio by completing specific exercises and activities - Maps all activities and exercises to the NMC competencies - Advises on approaches to a range of situations that may arise as a student nurse - Adopts a case-study approach to consolidating learning and to explore the patient pathway from pre-diagnosis, through a range of treatment options to living beyond cancer or end-of-life care. Series features: - A unique guide to getting the most from clinical placements - How to prepare for your

placement - What you can expect to learn during a placement - Clear links to, and examples of, achieving NMC competencies - Guidance on what to use as evidence for your portfolio - Case studies that link theory with practice - How to consolidate your experience and learn from the placement - Tips, activities, further reading suggestions and useful websites.
