

Differences Between IFRS And German GAAP

International Accounting and Reporting

Issues United Nations Conference on Trade and Development 2007-10-02 This volume of the 2006 Review of International Accounting and Reporting Issues contains the proceedings of the twenty-third session of the Intergovernmental Working Group of Experts on International Standards of Accounting and Reporting. The two main agenda items the session dealt with were: a review of practical implementation issues of International Financial Reporting Standards; and comparability and relevance of existing indicators on corporate responsibility.

Similarities and Differences: IFRS and German GAAP

The Routledge Companion to Financial Accounting Theory Stewart Jones 2015-05-22

Financial accounting theory has numerous practical applications and policy implications, for instance, international accounting standard setters are increasingly relying on theoretical accounting concepts in the creation of new standards; and corporate regulators are increasingly turning to various conceptual frameworks of accounting to guide regulation and the interpretation of accounting practices. The global financial crisis has also led to a new found appreciation of the social, economic and political importance of accounting concepts generally and corporate financial reporting in particular. For instance, the fundamentals of capital market theory (i.e. market efficiency) and measurement theory (i.e. fair value) have received widespread public and regulatory attention. This comprehensive, authoritative volume provides a prestige reference work which offers students, academics, regulators and practitioners a valuable resource containing the current scholarship and practice in the established field of financial accounting theory.

[Comparative International Accounting, 14th Edition](#) Christopher Nobes 2020 Now in its 14th edition, Nobes and Parker's Comparative International Accounting is a comprehensive and coherent text on international financial reporting. It is primarily designed for

undergraduate and postgraduate courses in comparative and international aspects of financial reporting. The book explores the conceptual and contextual found.

Ebook: International Accounting Timothy Douplik 2014-10-16 The Fourth Edition of International Accounting provides an overview of the broadly defined area of international accounting, but also focuses on the accounting issues related to international business activities and foreign operations. This edition also includes substantially updated coverage of the International Accounting Standards Board (IASB) and International Financial Reporting Standards (IFRS). The unique benefits of this textbook include its up-to-date coverage of relevant material, extensive numerical examples provided in most chapters, two chapters devoted to the application of International Financial Reporting Standards (IFRS), and coverage of nontraditional but important topics such as strategic accounting issues of multinational companies, international corporate governance, and corporate social responsibility reporting.

Contracts According to IFRS Elias Fiebig 2015-06-19 Bachelor Thesis from the year 2015 in the subject Business economics - Accounting and Taxes, grade: 1,0, European University Viadrina Frankfurt (Oder), course: International Accounting, language: English, abstract: Die Arbeit stellt die praktischen und theoretischen Konsequenzen der Umstellung der Umsatzerfassung nach International Rechnungslegungsstandards mit der Einführung des IFRS 15 dar. Dabei liegt der Fokus der Arbeit auf der bilanziellen Behandlung von Langzeitfertigungsaufträgen, zB. Eigentumswohnungen.

Consolidated Financial Statements in IAS/IFRS and German GAAP - Major

Differences Explained Khanh Pham-Gia 2009 Research Paper (undergraduate) from the year 2008 in the subject Business economics - Business Management, Corporate Governance, grade: 1,3, University of applied sciences, Munich, language: English, abstract: Due to a

regulation of the European Union (EU) concerning financial accounting issued on June 6th, 2002, all listed companies in EU are obligated to provide their Consolidated Financial Statements (CFS) in accordance with financial accounting principles of International Accounting Standards (IAS) or International Financial Reporting Standards (IFRS) from January 1st, 2005. This regulation enables a necessary harmonization of accounting principles within the EU and supports a clear comparability of CFS worldwide. The object of this study is to analyze major differences of CFS in German GAAP and IAS/IFRS. Thereby, variations of both accounting standards are compared and a major difference is explained thoroughly with a concrete example. The major differences of CFS in IAS/IFRS and German GAAP result from different aims of both accounting standards. The German GAAP is strongly based on prudence principle for protection of creditors and authoritative principle (tax accounting based on commercial accounting). In comparison, the IAS/IFRS deliver potential investors realistic and decision useful information about assets, finance, and profit situations of a company (true and fair view / fair presentation principle). These basic principles could be reflected in several key points of the both accounting standards whose differences are clarified in this study. Furthermore, an essential key point of CFS namely the basis of consolidation (contains enterprises included in the consolidation and capital consolidation methods) is illuminated with a concrete example. Hereby, the relation between the control influence of the parent enterprise on its "sub-entities" and the correspondent capital consolidation methods are studied.

Interpreting and Analyzing Financial Statements

Karen P. Schoenebeck 2012 The text and activities format allow the instructor to use this book as a stand-alone text for the first accounting course. This text helps students analyze real company financial statement information. Each activity in the book concentrates on only one aspect of the analysis and uses data from well-known corporations to pique students' interest and add relevancy.

The Handbook of Technology Management, Supply Chain Management, Marketing and Advertising, and Global Management Hossein Bidgoli 2010 The discipline of technology management focuses on the scientific, engineering, and management issues related to the commercial introduction of new technologies. Although more than thirty U.S. universities offer PhD programs in the subject, there has never been a single comprehensive resource dedicated to technology management. "The Handbook of Technology Management" fills that gap with coverage of all the core topics and applications in the field. Edited by the renowned Doctor Hossein Bidgoli, the three volumes here include all the basics for students, educators, and practitioners

Earnings Management and Its Determinants

Igor Goncharov 2005 Originally presented as the author's thesis (doctoral)--University of Bremen.

International Finance Hal S. Scott 2006 This casebook is an authoritative introduction to international finance, transactions, policy, and regulations. Case studies, case notes, and examples illustrate points under consideration. Thought-provoking questions generate classroom discussion and hone students' legal reasoning. Representative topics include international aspects of U. S. Securities regulation, the European Union, asset freezes, emerging markets, and offshore mutual funds.

Voluntary Implementation of IFRS in

German Non-Listed Companies Nadine Wiese

2009-11 Bachelor Thesis from the year 2008 in the subject Business economics - Accounting and Taxes, grade: 1,0, University of the West of England, Bristol (Bristol Business School), course: Accounting in Context, language: English, abstract: This report addresses the question whether unlisted German companies should voluntarily adopt IFRS. Benefits for internal as well as external users are discovered including facilitated international comparability and higher quality of financial reports.

Furthermore, a comparison reveals that equity figures and volatility are higher under IFRS than under German GAAP. It is discovered that national economic and political circumstances significantly influence reporting practices and thus quality and comparability. Combined with

fair value accounting which is of lower reliability as there are no active markets from which values can be derived, IFRS not necessarily seems to be a better alternative compared to German GAAP. Moreover, because IFRS is primarily intended for listed companies and investors' needs, IFRS only appears to be an alternative for non-listed companies that plan a listing. In general, the complex and costly implementation process must be outweighed thoroughly. If costs prevail other possibilities represent IFRS for SMEs or the continuation of German GAAP.

International Accounting Timothy S. Doupnik 2007 Doupnik and Perera's International Accounting takes in the whole realm of international accounting, while paying particular focus on the accounting issues related to international business activities and foreign operations.

German Mergers & Acquisitions in the USA Bernd Wübben 2007-11-29 Bernd Wübben analyzes the success of 87 German mergers and acquisitions in the USA during the period from 1990 to 2004. Employing a study of the capital markets' reaction and a survey of acquirers' executives, he shows that US transactions on average enhanced value for German companies and their shareholders. The author integrates the findings of both methodologies to identify the determinants of transaction success, including characteristics of the German acquiring and the US target companies as well as of the acquisition structure and management.
