Threshold Concepts in Physical Education Fiona C. Chambers 2020-11-17 This innovative and user-friendly book uses a design thinking approach to examine transformative learning and liminality in physical education. Covering theory and practice, it introduces the important idea of 'threshold concepts' for physical education, helping physical educators to introduce those concepts into curriculum, pedagogy and assessment. The book invites us to reflect on what is learned in, through and about physical education - to identify its core threshold concepts. Once identified, the book explains how the learning of threshold concepts can be planned using principles of pedagogical translation for all four learning domains (cognitive, psychomotor, affective and social). The book is arranged into three key sections which walk the reader through the underpinning concepts, use movement case studies to explore and generate threshold concepts in physical education using design thinking approach and, finally, provide a guiding Praxis Matrix for PE Threshold Concepts that can be used for physical educators across a range of school and physical activity learning contexts. Outlining fundamental theory and useful, practical teaching and coaching advice, this book is invaluable reading for all PE teacher educators, coach educators, and any advanced student, coach or teacher looking to enrich their knowledge and professional practice.

Le Japon : un ordre de croyance Jonathan Jay Mourton 2013-02-01 La société japonaise est un miroir du "Fait religieux" shintô et bouddhique. Derrière le maintien des croyances religieuses, on pourrait voir un gage d'une volonté de préserver l'harmonie de l'ordre social japonais, c'est une "religion utilitaire" à bien des égards... Au cours de l'histoire, le Japon a façonné son rapport au monde à l'aune des croyances, pensées et techniques en les intégrant au culte millénaire des divinités shintô et plurimillénaires du bouddhisme.

Next Business Model 2026: SILVER-AGING The Innovation Lab Inc. 2026-01-01 Next Business Model 2026 Series "Reading Trends Across 25 Industries via Data, and Specific Business Opportunities": A practical industry-by-industry report series presented by The Innovation Lab through the analysis of 5,000 business models. The Innovation Lab, a consulting group specializing in business trend analysis and business model consulting, is simultaneously releasing a 25-volume series of industry-specific reports forecasting the 2026 business landscape. Why 25 industries? Today's business does not move on vague predictions or gut feelings. Accordingly, The Innovation Lab conducted a complete survey of over 5,000 business model (BM) data points from its proprietary analysis platform, 'NextBM200,' to quantitatively analyze changes across 25 key industries that comprise the global market including Korea. Focusing on specific 'Business Models' instead of grand future discourses: This series avoids abstract futurology or grand narratives. Instead, it focuses on presenting the actual trends emerging within each industry, along with specific 'cases' and 'data' on business models that companies and individuals can implement immediately. Intelligence Briefing for Leaders Navigating an Era of Uncertainty "In 2026, is your business lost in the fog? Or is it on the map?" "Moving past vague forecasts to discuss business models you should review right now" Every year, countless trend forecast books are published, yet few provide a clear answer when planners and executives in the field ask, "So, what business model should we actually try in our industry?" The []Next Business Model 2026[] series, published by 'The Innovation Lab'—a business trend analysis and business model consulting group—was designed specifically to address this need. This series was written based on 'NextBM200,' a proprietary platform featuring vast data on over 5,000 business models across 25 industries. Its primary differentiator is that it deals exclusively with business models rigorously verified by data, rather than intuition or speculation. This book tracks how the macro changes of 2026 are branching out into specific business forms at the ground level of each industry. Beyond fundamental statements like "AI is rising" or "Hyper-personalization is important," readers can use this book to identify specific revenue models and service structures currently operating in the market. Each volume presents a detailed analysis of promising business models worth benchmarking or adopting immediately, alongside the latest industry trend data. For those who need practical references that can be applied directly to next year's business plan—rather than abstract futurology—this series will serve as the most reliable database. Key Components of the Book 1. Data-Driven Industry Trend Analysis: Patterns of change observed in each of the 25 industries are objectively analyzed and organized using data from NextBM200. 2. Exploration of Accessible Business Models (BM): Moving beyond vague concepts, the series provides detailed analyses and introductions of specific BM cases that have either been validated in the real market or are newly emerging. 3. Practical Insights: Provides insights focused on business structures and implementation points, allowing planners and executives to immediately apply and evaluate them within their own businesses. The []Next Business Model 2026[] series will serve as the most practical and useful data-driven business reference for those designing and executing business in the field.
