Teaching Children Science

Joseph Abruscato 2004

Intended for both pre-service and practicing teachers, "Teaching Children Science, Sixth Edition" provides elementary science methods, content, and activities using Abruscato's "discovery approach" presenting contemporary ideas in a motivating, engaging writing style that captivates future classroom teachers and enhances instruction in the science classroom. Allow your students to "discover" science through this practical text. Each chapter begins with "A Look Ahead" and "Going Further." Each chapter concludes with a summary, "Suggested Readings," and "Real Teachers Talking: A Starting Point for Thinking, Talking, and Writing." In the first section, STRATEGIES

AND TECHNIQUES, the author starts your students on a path to discovery by asking questions like AA How Can I Use Key Ideas from Learning Theory to Create a Discovery-Based Classroom? How Can I Use the Science Process Skills as Starting Points for Discovery Unit and Lesson Planning? How Can I Use Cooperative Learning, Special Questioning, Active Listening and Other Strategies to Foster Discovery Learning? And moreA In the second section, EARTH/SPACE SCIENCES AND TECHNOLOGY: UNIT/LESSON PLAN STARTER IDEAS, SCIENCE CONTENT AND DISCOVERY ACTIVITIES, your students will learn how to adapt science curriculum, bring in content, and conduct activities in areas such as The Cosmos and The EarthAs Atmosphere. In the third section, LIFE SCIENCES AND TECHNOLOGY: UNIT/LESSON

PLAN STARTER IDEAS, SCIENCE CONTENT AND DISCOVERY ACTIVITIES, your students will learn how to adapt science curriculum, bring in content, and conduct activities in areas such as Plants and Animals and The Human Body. "This is an excellent resource for future teachers to have during their actual teaching." Professor Russell Agne, "The University of Vermont" "Dr. AbruscatoAs writing style appeals to those who aspire to teach science as well as to those who have a desire to teach but are among the many who tend to be science shy." Professor Jim Dawson, "Rochester College" Author bio: Dr. Joseph Abruscato received his Bachelors and Masters Degrees from Trenton State College and his Ph.D. from The Ohio State University. He presently teaches science curriculum and methods courses at the University of Vermont, Burlington. He was inspired by his own teachers to enter the teaching profession and his personal experience as

a teacher has enhanced his professional work as a teacher educator. Dr. Abruscato has presented hundreds of speeches and workshops across the United States and Canada and has published a variety of science books for children and teachers including "Teaching Children Science" and "Whizbangs and Wonderments." Language Learning Horizons 2001-04 Our educators make language and math skills fun to attain. Perforated pages let children display their work proudly. Skill Builders really encourage independent learning and prepare children for standardized tests.

Teaching Mathematics in Elementary and Middle School Joseph G. R. Martinez 2007 With an emphasis on inquiry and process, "Teaching Mathematics in Elementary and Middle School" embraces active mathematics instruction and the development of mathematical thinking through problem solving. The text challenges future teachers to prepare their K-8 students for a world that requires a higher level of mathematical literacy and enables them to compete in a global society. Teachers will develop their own

mathematical abilities, allowing them to help students discover a rich combination of thinking processes and problem-solving strategies, raising the learning expectations for all. Unique text features "TIE-Thought, Investigation and Exploration" features ask pre-service teachers to develop their own thinking and learning abilities, preparing them to better challenge their students. "Mathematics in the Real World," "Idea Files," and "Teacher Profiles" model best practices and supply readers with concrete teaching tools and strategies. "Mathematical Thinking," "Mathematical Games" and "Mathematics and Technology" features detail activities to engage and develop students' mathematical thinking. Accompanying student artifacts illustrate the progression of students' conceptual understanding. [CD logo replaces bullet] "Math Activities CD-ROM" provides an outstanding text component containing more than 100 activities that use a three-step

process-explore, invent, discover-to foster the development of mathematical thinking through guided inquiry. Aligned with the NCTM standards, each activity is integrated within the text and designed to help develop students' conceptual understanding of mathematics. "Mathematics in Literature" offers thoroughly developed ideas for using children's literature to create meaningful contexts for mathematics learning. An extensive bibliography that can be used for this purpose appears on the CD-Rom. "I think the text is an excellent resource for elementary and middle school methods courses. In particular, I like how the textbook handles the 'bigger issues' such as geometric reasoning rather than just 'geometry.' I also like the excellent foundation in educational research that the textbook provides, as well as some very careful attention and consistent referencing to the NCTM standards and principles. The incorporation of classroom vignettes, teacher

illustrations, and samples of student work also all add to the excellent grounding of the text in real world classroom work."
