A Textbook of Plant Physiology Nikolai

Qualitative Research in STEM Sherry Marx
2016-07-01 Qualitative Research in STEM
examines the groundbreaking potential of
qualitative research methods to address issues
of social justice, equity, and sustainability in
STEM. A collection of empirical studies
conducted by prominent STEM researchers, this
book examines the experiences and challenges
faced by traditionally marginalized groups in
STEM, most notably culturally and linguistically
diverse students and women. Investigations into
these issues, as well as the high dropout rate
among engineering students and issues of
academic integrity in STEM, come with detailed
explanations of the study methodologies used in

each case. Contributors also provide personal
narratives that share their perspectives on the
benefits of qualitative research methodologies
for the topics explored. Through a variety of
qualitative methodologies, including
participatory action research, Indigenous
research, and critical ethnography, this volume
aims to reveal and remedy the inequalities
within STEM education today.

Student Reasoning in Organic Chemistry Nicole Graulich 2022-12-21 Reasoning about structure-reactivity and chemical processes is a key competence in chemistry. Especially in organic chemistry, students experience difficulty appropriately interpreting organic representations and reasoning about the underlying causality of organic mechanisms. As organic chemistry is often a bottleneck for students' success in their career, compiling and distilling the insights from recent research in the field will help inform future instruction and the empowerment of chemistry students worldwide. This book brings together leading research groups to highlight recent advances in chemistry education research with a focus on the characterization of students' reasoning and their representational competencies, as well as the impact of instructional and assessment practices in organic chemistry. Written by leaders in the

field, this title is ideal for chemistry education researchers, instructors and practitioners, and graduate students in chemistry education.
