Agriculture and Rural Development in a Globalizing World Prabhu Pingali 2017-05-08 Rapid structural transformation and urbanization are transforming agriculture and food production in rural areas across the world. This textbook provides a comprehensive review and assessment of the multi-faceted nature of agriculture and rural development, particularly in the developing world, where the greatest challenges occur. It is designed around five thematic parts: Agricultural Intensification and Technical Change; Political Economy of Agricultural Policies; Community and Rural Institutions; Agriculture, Nutrition, and Health; and Future Relevance of International Institutions. Each chapter presents a detailed but accessible review of the literature on the specific topic and discusses the frontiers in research and institutional changes needed as societies adapt to the transformation processes. All authors are eminent scholars with international reputations, who have been actively engaged in the contemporary debates around agricultural development and rural transformation.

Research Methodology in Agricultural Sciences Jayne Njeri Mugwe 2026-01-01 This authored textbook provides a comprehensive guide to the methods and methodologies currently used in agricultural research, covering the entire process from conceptualisation to reporting. Recognising the interdisciplinary nature of agricultural science, the book integrates both biophysical and social science approaches, including experimental design, on-farm research, surveys, qualitative and mixed-methods research, and impact evaluation. It also addresses both quantitative and qualitative data analysis. In addition to methodological guidance, the book offers practical support in scientific writing, thesis development, journal article publication, and science communication. Theories and concepts are clearly explained using real-world examples, flow diagrams, photographs, and case studies to enhance understanding. Designed to support students and early-career researchers, this book helps ease the steep learning curve associated with conducting credible, ethical, and impactful research. It will be a valuable resource for students, faculty, researchers, professionals, agricultural scientists, and policy makers in both national and international contexts.

Libraries Beyond Their Institutions Rita Pellen 2014-06-03 Discover collaborative possibilities for your library beyond mere memberships in bibliographic utilities *Libraries Beyond Their Institutions: Partnerships That Work* illustrates the remarkable range of cooperative activities in which libraries are engaged in order to provide the best possible service. Increasingly, librarians recognize the need to link their institutions to the world around them as part of their obligation to enhance the integration of digital information, not only for students in academic settings, but also throughout all levels of society. An excellent companion and complement to *Libraries Within Their Institutions: Creative Collaborations* (Haworth) from the same editors, this unique book examines the variety of ways librarians work with community organizations, government agencies, professional organizations, minority communities, and city governments in their efforts to serve not just students in academic settings, but all of society. *Libraries Beyond Their Institutions: Partnerships That Work* reflects the growing understanding of the key role played by libraries in the development of civil society. This unique book examines the variety of possibilities for collaborations outside institutions, including the ways librarians function in a variety of other campus settings, such as writing centers, teaching excellence centers, and academic departments in support of teaching, learning, and research; partnerships with graduate school, and information resources management to preserve theses and dissertations electronically; promoting civic partnerships; initiating a campus-wide information literacy resource; and partnering with government agencies to form a data literacy program. *Libraries Beyond Their Institutions: Partnerships That Work* provides practical information on: collaborative training programs to develop baseline competencies in academic libraries to support data services the Chicano/Latino Network and the Community Digital Initiative developing an international presence through digital resource sharing successful models of statewide library consortia technology-based partnerships promoting K-20 information literacy collaborations between the United States Patent and Trademark Office and patent and trademark depository libraries (PTDL) the development of AgEcon Search, an alternative method of delivering research results *Libraries Beyond Their Institutions: Partnerships That Work* is an invaluable resource for librarians working in academic, school, special, and public settings, and for library science faculty and students.
