*Better Governance Across the Board* John Zinkin 2019-05-20 Better Governance Across the Board is a practical guide for achieving good corporate governance of organizations regardless of whether they are for profit, listed, state-owned, family owned, or widely held. It delves into the questions boards must ask if they are to fulfill their fiduciary duties, taking account of regulatory issues. Part 1 defines corporate governance, explaining the four reasons why it matters and how it applies to a wide range of organizations. Part 2 explores the "Five P" framework of Purpose, Principles, Power, People, and Processes that helps boards to create sustainable value. Part 3 concludes by showing how the organization's long-term "license to operate" is achieved by boards focusing on the three most important assets of the organization: its reputation; its people, and its processes. This book explores the dilemmas that currently exist in modern approaches to corporate governance and suggests ways of overcoming them. Based on ten years of teaching more than 1,500 directors of publicly listed companies, it integrates key principles of leadership, ethics, branding, and governance into a unique five-factor framework to help directors make good decisions in strategy, risk management, succession planning, internal controls, and stakeholder engagement.

*About My Father's Business Workbook* John L. Donelson 2025-10-24 About My Father's Business is more than a book—it's a blueprint for building a life and business rooted in divine purpose. Designed as a hands-on workbook, this guide equips faith-based entrepreneurs to align their ventures with biblical principles, spiritual clarity, and personal calling. Through seven foundational questions—Who am I? Why am I here? What can I do? When am I most effective? Where am I from? Where am I going? How will I get there?—You'll uncover the spiritual architecture that supports your identity, unlocks your potential, and

clarifies your promise. This book challenges the myth that life is random or that God's ways are unknowable. Instead, it reveals how predictable patterns emerge when you practice the principles laid out in His Word. If you're ready to do business by the Book, this workbook will help you build a foundation that lasts—in this life and beyond.

However, non-cyber executives find it challenging to understand their role in increasing the business's cyber resilience due to its complex nature and the lack of a clear return on investment. This book demystifies the perception that cybersecurity is a technical problem, drawing parallels between the key responsibilities of the C-suite roles to line up with the mission of the Chief Information Security Officer (CISO). The book equips you with all you need to know about cyber risks to run the business effectively. Each chapter provides a holistic overview of the dynamic priorities of the C-suite (from the CFO to the CIO, COO, CRO, and so on), and unpacks how cybersecurity must be embedded in every business function. The book also contains self-assessment questions, which are a helpful tool in evaluating any major cybersecurity initiatives and/or investment required. With this book, you'll have a deeper appreciation of the various ways all executives can contribute to the organization's cyber program, in close collaboration with the CISO and

the security team, and achieve a cyber-resilient, profitable, and sustainable business. What you will learn Understand why cybersecurity should matter to the C-suite Explore how different roles contribute to an organization's security Discover how priorities of roles affect an executive's contribution to security Understand financial losses and business impact caused by cyber risks Come to grips with the role of the board of directors in cybersecurity programs Leverage the recipes to build a strong cybersecurity culture Discover tips on cyber risk quantification and cyber insurance Define a common language that bridges the gap between business and cybersecurity Who this book is for This book is for the C-suite and executives who are not necessarily working in cybersecurity.
