Monstrous Spaces: The Other Frontier 2019-01-04

This volume was first published by Inter-Disciplinary Press in 2013. *Monstrous Spaces: The Other Frontier*, is a collection of essays presented during the First Global Conference of Monstrous Geography held at Manchester College, Oxford. When examining monstrous geographies, we encounter an Other frontier, a space that runs counter to the socially constructed space of culture that at the same time includes, overlaps, and co-occupies the cultural landscape.

The Thought of Things Kiff Slemmons 2000

Insectopedia - The secret world of southern African insects Erik Holm 2017-03-30

Insectopedia uncovers the fascinating and infinitely varied world of insects. It explores their intriguing behaviour and biology - from mating and breeding, metamorphosis and

movement to sight, smell, hearing and their adaptations to heat and cold. A chapter on superorganisms probes the curious phenomenon of social communities among insects; another covers the critical role that these creatures play in maintaining the fragile balance of life on our planet. The book concludes with a 60-page illustrated field guide, describing most insect orders and their main families. Previously published as *Insectlopedia of Southern Africa*, this fully revised and redesigned edition includes up-to-date information throughout, an expanded ID section, and several hundred new photographs. Sales points: more than 700 photographs, many depicting seldom photographed insect behaviours, clear, easy to read text, and a range of feature and fact boxes that add a lively touch, includes an ID section with photographs and line

illustrations, the author is well known for his radio talks on insects.

Insecto-pedia world picture is the perfect way for your child to see that there are more insects in the world than just the ones in your back yard. You can sit your child down and explore the world with them. See the excitement on their face as they see all the colorful insects that they have never seen before.

Insectpedia Eric R. Eaton
 2022-05-03 A fun and fact-filled A-Z treasury for the insect lover in all of us Insectpedia introduces you to the wonders of the insect world while inviting you to make discoveries of your own. Featuring dozens of entries on topics ranging from murder hornets and the “insect apocalypse” to pioneering entomologists such as Margaret James Strickland Collins and Douglas Tallamy, this beautifully illustrated, pocket-friendly encyclopedia dispels many common myths about insects while offering new perspectives on the vital relationships we share with these incredible creatures. This entertaining collection

celebrates the long and storied history of entomology, highlights our dependence on insects for food and ecosystem services, and explains the meaning behind various entomological terms. With Eric Eaton as your guide, you will circle the globe in search of African Toktokkies and Australian beer bottle beetles, and witness the peculiar spectacle of cricket fighting in Asia. Profiles of influential figures in entomology provide insights into the curious minds that animate this extraordinarily broad field of scientific inquiry, while the book’s portable size makes it the perfect travel companion no matter where your own entomological adventures may lead you. With captivating illustrations by Amy Jean Porter, Insectpedia is an engaging blend of insect facts and folklore that will inspire anyone who delights in the marvels of nature. Features a real cloth cover with an elaborate foil-stamped design

2011-03-22 A New York Times Notable Book A stunningly original exploration of the ties that bind us to the beautiful, ancient, astoundingly accomplished, largely unknown, and unfathomably different species with whom we share the world. For as long as humans have existed, insects have been our constant companions. Yet we hardly know them, not even the ones we're closest to: those that eat our food, share our beds, and live in our homes. Organizing his book alphabetically, Hugh Raffles weaves together brief vignettes, meditations, and extended essays, taking the reader on a mesmerizing exploration of history and science, anthropology and travel, economics, philosophy, and popular culture.

Insectopedia shows us how insects have triggered our obsessions, stirred our passions, and beguiled our imaginations.

This book uncovers the complex and fascinating world of insects, from movement and locomotion, metamorphosis and reproduction to sound and hearing, smell, adaptations and their role in nature. The main focus is on behaviour and biology but the book concludes with a brief ID section. A fascinating read that's written by a specialist in the field, and richly illustrated with photographs and line drawings.
