*My Motherf*cking Parenting Manifesto* Topaz Star 2014-06-20 Many people live their lives on auto-pilot, and usually don't take the time to ask if it truly serves them or not. This book delves into the spiritual holdings that most people carry around, and tools to help move beyond them. With the use of humor and

personal experiences, throughout the book, these tools can be more easily applied to a broader range of individuals. It's basically a crash course in spirituality for dumbasses! For too long, spirituality has been enshrouded in an air of superiority and 'holier than thou-ness'. This book aims to appeal not only to the higher ups, but also to those who are newbies, and are in dire need of guidance. After all, there is a pressing need for humanity to become more unified, and whole in order to progress. We can only move forward if we all move together in unity!

Causation and Responsibility Michael S. Moore 2010-07-15 The concept of causation is fundamental to ascribing moral and legal responsibility for events. Yet the relationship between causation and responsibility remains unclear. What precisely is the connection between the concept of causation used in attributing responsibility and the accounts of causal relations offered in the philosophy of science and metaphysics? How much of what we call causal responsibility is in truth defined by non-causal factors? This book argues that much of the legal doctrine on these questions is confused and incoherent, and offers the first comprehensive attempt since Hart and Honoré to clarify the philosophical background to the legal and moral debates. The book first sets out the place of causation in criminal and tort law and outlines the metaphysics presupposed by the legal doctrine. It then analyses the best theoretical accounts of causation in the philosophy of science and metaphysics, and using these accounts criticises many of the core legal concepts surrounding causation - such as intervening causation, foreseeability of harm and complicity. It considers and rejects the radical proposals to eliminate the notion of causation from law by using risk analysis to attribute responsibility. The result of the analysis is a powerful argument for revising our understanding of the role played by causation in the attribution of legal and moral responsibility.

Adaptation in Young Adult Novels Dana E. Lawrence 2020-09-03 *Adaptation in Young Adult Novels* argues that adapting classic and canonical literature and historical places engages young adult readers with their cultural past and encourages them to see how that past can be rewritten. The textual afterlives of classic texts raise questions for new readers: What can be changed? What benefits from change? How can you, too, be agents of change? The contributors to this volume draw on a wide range of contemporary novels - from Rick Riordan's Percy Jackson series and Megan Shepherd's Madman's Daughter trilogy to Jesmyn Ward's *Salvage the Bones* - adapted from mythology, fairy tales, historical places, and the literary classics of Shakespeare, Charles Dickens, Jane Austen, and F. Scott Fitzgerald, among others. Unpacking the new perspectives and critiques of gender, sexuality, and the cultural values of adolescents inherent to each adaptation, the essays in this volume make the case that literary adaptations are just as valuable as original works and demonstrate how the texts studied empower young readers to become more culturally, historically, and socially aware through the lens of literary diversity.
