Managerial Decision Modeling

Nagraj (Raju) Balakrishnan

2017-08-07 This book fills a void for a balanced approach to spreadsheet-based decision modeling. In addition to using spreadsheets as a tool to quickly set up and solve decision models, the authors show how and why the methods work and combine the user's power to logically model and analyze diverse decision-making scenarios with software-based solutions. The book discusses the fundamental concepts, assumptions and limitations behind each decision modeling technique, shows how each decision model works, and illustrates the real-world usefulness of each technique with many applications from both profit and nonprofit organizations. The authors provide an introduction to managerial decision modeling, linear programming models, modeling applications and

Managerial Decision Modeling with Spreadsheets Nagraj Balakrishnan 2013 For courses on decision modeling through the use of spreadsheets. The perfect balance between decision modeling and spreadsheet use. It's important that textbooks support decision modeling courses by combining student's ability to logically model and analyze diverse decision-making scenarios with software-based solution procedures. Balakrishnan offers the perfect balance of the decision modeling process

and the use of spreadsheets to set up and solve decision models. The third edition has been updated to reflect the latest version of Excel.

The Graphic Syllabus and the Outcomes Map Linda B. Nilson 2007-10-12 This book shows college instructors how to communicate their course organization to students in a graphic syllabus—a one-page diagram, flowchart, or concept map of the topical organization—and an outcomes map—a one-page flowchart of the sequence of student learning objectives and outcomes from the foundational through the mediating to the ultimate. It also documents the positive impact that graphics have on student learning and cautions readers about common errors in designing graphic syllabi.

Statistics, Data Analysis, and Decision Modeling James Robert Evans 2003 This book covers basic concepts of

Managerial Decision Modeling With Spreadsheets Solution

business statistics, data analysis, and management science in a spreadsheet environment. Practical applications are emphasized throughout the book for business decision-making; a comprehensive database is developed, with marketing, financial, and production data already formatted on Excel worksheets. This shows how real data is used and decisions are made. Using Excel as the basic software, and including such add-ins as PHStat2, Crystal Ball, and TreePlan, this book covers a wide variety of topics related to business statistics: statistical thinking in business; displaying and summarizing data; random variables; sampling; regression analysis; forecasting; statistical quality control; risk analysis and Monte-Carlo simulation; systems simulation modeling and analysis; selection models and decision analysis; optimization modeling; and solving and analyzing optimization models. For those employed in the fields of quality control, management

science, operations management, statistical science, and those who need to interpret data to make informed business decisions.

Balakrishnan 2007-09 This Text Emphasizes Balancing The Theory Behind Decision Modeling And The Use Of Spreadsheets To Easily Set Up And Solve These Models. From A Managerial Is To Gain Insight Into The Problem, Not The Detailed Mechanics Of The Solution Process.

Introduction to Management Science

Bernard W. Taylor 2002 For courses in Management Science, Quantitative Methods or Decision Models. This widely adopted text presents an accessible introduction to the techniques and applications of management science. It is designed to make the subject easy to understand, interesting and accessible for students with limited mathematical

background or skills. The author focuses on management science not only as a collection of techniques and processes, but as a philosophy and method for approaching problems in a logical manner, and includes spreadsheets with solutions in every chapter.
