

Managerial Economics H Craig Petersen Solutions

American Book Publishing Record 1992

Managerial Economics Petersen / Jain 2006-09 Managerial Economics offers a lively presentation of analytical and empirical tools for managerial decision-making. This edition increases the emphasis on managerial applications with more problems, case studies, and questions. With this book, students will not only receive a complete and rigorous introduction to the basic principles of microeconomics, but also learn how the application of economic theory can improve decision making.

Operations Management Joel D. Wisner 2016-06-20 Finally, an operations management book to get excited about. Operations Management: A Supply Chain Process Approach exposes students to the exciting and ever-changing world of operations management through dynamic writing, application, and cutting-edge examples that will keep students interested and instructors inspired! Author Dr. Joel Wisner understands that today's students will be entering a highly competitive global marketplace where two things are crucial: a solid knowledge of operations management and an understanding of the importance for organizations to integrate their operations and supply chain processes. With this in mind, Wisner not only provides a clear and comprehensive introduction to operations management, but also gives attention to the important processes involved in linking firms' operations in a supply chain environment.

Information Systems Paulo Rupino da Cunha 2026-03-31 The two-volume set LNBIP 572 + 573 constitutes selected papers from the 22nd European, Mediterranean, and Middle Eastern Conference, EMCIS 2025, which was held in Paphos, Cyprus, during September 11-12, 2025. EMCIS covers technical, organizational, business, and social issues in the application of information technology and is dedicated to the definition and establishment of Information Systems (IS) as a discipline of high impact for IS professionals and practitioners. It focuses on approaches that facilitate the identification of innovative research of significant relevance to the IS discipline following sound research methodologies that lead to results of measurable impact. The 52 papers presented in the proceedings were carefully reviewed and selected from a total of 153 submissions. They were organized in topical sections as follows: Part I: Artificial Intelligence; Advanced Topics in Big Data, Data Management, and Machine Learning; Blockchain Technology and Applications; Smart Cities; Information Systems Security, Information Privacy Protection and Cyber Resilience; Part II: Classical and Emerging Digital Governance - The AI Era; Digital Services and Social Media; Digital Sustainability and Green IT; Emerging Technologies in Policing and Security; Healthcare Information Systems; and Management Information Systems.

Sustainability Assessment Alan James Bond 2013 Currently the writing on the subject is limited and comprises, for the most part, guidance documents and completed assessments.
