Family Life, Family Law, and Family Justice

Marsha Garrison 2022-10-28 *Family Life, Family Law, and Family Justice: Tying the Knot* combines history, social science, and legal analysis to chart the evolution and interdependence of family life and family law, portray current trends in family life, explain the pressing policy challenges these trends have produced, and analyze the changes in family law that are essential to meeting these challenges. The challenges are large and pressing. Across

the industrialized West, nonmarital birth, relational stress, multi-partner fertility, and relationship dissolution have increased, producing a dramatic rise in single parenthood, poverty, and childhood risk. This concentration of familial and economic risk accelerates socioeconomic inequality and retards intergenerational mobility. Although the divide is most pronounced in the United States, the same patterns now affect families throughout the Western world. Across the European Union, there are 9.2 million "lone" parents, and just under half of their families live in poverty. *Tying the Knot* demonstrates how today's family patterns are deeply rooted in long-standing, class-based differences in family life and explains why these class-based differences have accelerated. It explains how the values that

guide family law development inevitably reflect the world in which families live and develops a new family law capable of meeting the needs of twenty-first century families. The book will be of considerable interest to family specialists from a number of fields, including law, demography, economics, history, political science, public health, social policy, and sociology.

Artificial Intelligence Research Aurna Gerber 2024-12-01 This book constitutes the refereed proceedings of the 5th Southern African Conference on Artificial Intelligence Research, SACAIR 2024, held in Bloemfontein, South Africa, during December 2-6, 2024. The 29 full papers presented in these proceedings were carefully reviewed and selected from 101 submissions. The papers are organized in the following topical sections: algorithmic and Data Driven AI; socio-technical and human-centred AI (Information Systems); responsible and Ethical AI (Philosophy, Law and Humanities); symbolic AI and Knowledge Representation and

Reasoning.

Introduction to Mathematical Analysis Naokant

Deo 2025-01-27 This book is a straightforward

and comprehensive presentation of the concepts and methodology of elementary real analysis.

Targeted to undergraduate students of mathematics and engineering, it serves as the foundation for mathematical reasoning and proofs. The topics discussed are logic, methods of proof, functions, real number properties, sequences and series, limits and continuity and differentiation and integration (Riemann integral and Lebesgue integral). The book explains the concepts and theorems through geometrical and pictorial representation. Limits of sequences and functions, topology of metric spaces, continuity of functions and the Cauchy sequence have been thoroughly discussed in the book.

The Routledge Companion to Linguistics in

India Hemalatha Nagarajan 2022-10-20 This

companion offers a unique introductory study of linguistics in India. Well supplemented with sample problems and linguistic puzzles to bolster analytical skills and logical reasoning, it promotes a unique inquiry-based approach to learning linguistics. The volume looks at all the major subdisciplines of linguistics, including phonetics, phonology, morphology, semantics, syntax, and the interdisciplinary domains of psycholinguistics and neurolinguistics. It provides a wealth of data not only from many Indian languages belonging to the primary language families present in the country - Indo-Aryan, Dravidian, Austro-Asiatic, and Tibeto-Burman - but also from the endangered languages of the Tai-Kadai family of Assam and the Greater Andamanese family. The author gives a holistic view of the linguistic landscape of India and fills a significant gap in the study of the lesser-known languages of South Asia. This volume will be an excellent resource for students and researchers of Indian languages, cultural

studies, South Asian studies, and all branches of linguistics.

Photonics Modelling and Design Slawomir

Sujecki 2018-09-03 Photonics Modeling and Design delivers a concise introduction to the modeling and design of photonic devices. Assuming a general knowledge of photonics and the operating principles of fibre and semiconductor lasers, this book: Describes the analysis of the light propagation in dielectric media Discusses heat diffusion and carrier transport Applies the presented theory to develop fibre and semiconductor laser models Addresses the propagation of short optical pulses in optical fibres Puts all modeling into practical context with examples of devices currently in development or on the market

Providing hands-on guidance in the form of MATLAB® scripts, tips, and other downloadable content, Photonics Modeling and Design is written for students and professionals interested in modeling photonic devices either for gaining a deeper understanding of the operation or to optimize the design.
