The Teaching of Instrumental Music Richard J. Colwell 2017-10-12 The Teaching of Instrumental Music, Fifth Edition introduces music education majors to basic instrumental pedagogy for the instruments and ensembles commonly found in the elementary and secondary curricula. It focuses on the core competencies required for teacher certification in instrumental music, with the pervasive philosophy to assist teachers as they develop an instrumental music program based on understanding and respecting all types of music. Parts I and II focus on essential issues for a successful instrumental program, presenting first the history and foundations, followed by effective strategies in administrative tasks and

classroom teaching. Parts III, IV, and V are devoted to the skills and techniques of woodwind, brass and percussion, and string instruments. In all, *The Teaching of Instrumental Music* is the complete reference for the beginning instrumental teacher, commonly retained in a student's professional library for its unique and comprehensive coverage. NEW TO THIS EDITION: Revision and updating of curriculum developments, such as coordinating State Department of Education student learning objectives with the recent Every Student Succeeds Act (ESSA) New discussion of the NAfME National Standards as they relate to the teaching of instrumental music Revamping of rehearsing instrumental ensembles chapters, including new or expanded sections on programming, choosing quality music, and

applying successful rehearsal techniques
Updates on references, plus new discussion questions, and websites and internet links A chapter devoted to classroom guitar Updates on the use of technology for teaching and learning music More on healthy performance practice, marching band, and jazz band Online materials located in the eResources section on the Routledge website.
