International Marketing

Management Ralph Berndt

2023-05-23 For every company that is active internationally, a systematically operated cross-national marketing management is indispensable in order to secure its own existence in the long term. The rapid changes on many markets and in many countries also mean that professional information gathering and processing of market-relevant data must take place within the framework of international market research. Based on this data, market-oriented decisions have to be made within international marketing management in order to achieve operational goals. This book deals not only with the "classic" topics of international marketing, such as international market research and the international use of individual marketing instruments, but also with the

various management sub-functions of planning, controlling, organization and human resources management in internationally active companies, each with a specific reference to marketing in the sense of market-oriented corporate management. The theoretically presented correlations are enriched by current data on the relevant framework conditions on international markets, empirical findings on the individual fields of action of international marketing management as well as numerous current examples from entrepreneurial practice. With this comprehensive presentation of international marketing management, the authors address lecturers and students as well as practitioners who deal with marketing issues in an international context.

The Complete Book of BMW

Tony Lewin The Complete Book of BMW is a master work. The word 'definitive' is a bold claim but this book should be viewed in this light. It is the most comprehensive survey of BMW Group models from the 501 right up to this year's 1 and 6 Series published in the English language. Data tables covering specifications, production volumes and prices will be invaluable to the BMW enthusiast and the layout and production volumes are second to none. Tony Lewin deserves

high praise for this outstanding book. - Chris Willows, Corporate Communications Director, BMW Great Britain BMW is the most remarkable phenomenon to hit the auto industry in a generation. Celebrated for its luxury sports cars, motorcycles and aero engines in the pre-war era, it squandered its glamorous heritage in the 1950s; on its knees and near-bankrupt, it was rejected as a lost cause when offered by desperate banks to Mercedes-Benz. But thanks to a wealthy German aristocrat, a brilliant engineer and a young and inspirational manager, Mercedes would soon regret not having scooped up the once-glorious firm: pioneering the concept of the compact, high-quality sports saloon, the visionary new team systematically built BMW into the spectacular success we know today. Through the most expressive medium of all - the cars themselves - The Complete Book of BMW tells the story of one of the most remarkable turnarounds of the century. From the iconic
