Readings in the Anthropocene brings together scholars from German Studies and beyond to interpret the German tradition of the last two hundred years from a perspective that is mindful of the challenge posed by the concept of the Anthropocene. This new age of man, unofficially pronounced in 2000, holds that humans are becoming a geological force in shaping the Earth's future. Among the biggest challenges facing our future are climate change, accelerated species loss, and a radical transformation of land use. What are the historical, philosophical, cultural, literary, and artistic responses to this new concept? The essays in this volume bring German culture to bear on what it means to live in the Anthropocene from a historical, ethical, and aesthetic perspective.

The Stormrider Guide Bruce Sutherland 2002 The first and only guide describing North America's most famous waves, specifically written for surfers, by surfers, in collaboration

with America's leading surf journalists. Its functional design with beautiful images from the best international surf photographers, plus accurate relief maps, make it the only complete guide to wave sport locations in North America. A crucial travel guide for all types of surfers, providing essential information on where to go, when to go, history, culture and environment. Appraisals of the North American continent from Baja to Alaska in the west and Miami to Nova Scotia in the east. Detailed information on the main surfing locations include consistency, crowds, hazards and many environmental notes from access to water quality.
