The Law of Cross-Border Business

Transactions Lutz-Christian wolff 2017-12-15

Law of Cross-Border Business Transactions aims at giving a structured introduction to the law and practice of investment deals (e.g., greenfield projects, M&As and hybrid forms) and of non-investment transactions (e.g., trade, technology transfer and services). Cross-border business deals are nowadays routine matters for business entities all over the world and the related legal aspects are becoming more and more complex. This book provides extensive general background information. It also covers numerous specific issues of relevance in the context of cross-border projects. Substantive law issues, procedural aspects and skills-related considerations such as contract drafting,

structuring options and cross-cultural lawyering techniques are included, adding up to an unusually comprehensive and useful guide in the field. What's in this book: The author describes a wide spectrum of transaction types. He explains underlying principles from a conceptual and a comparative point of view with a focus on transactional issues, using case studies from a variety of jurisdictions to demonstrate the significance of particular aspects in the context of multi-jurisdictional legal practice. Among much else, topics include the following: international lawyering and cultural diversity; lex mercatoria; conflict of laws; letters of intent, position papers, heads of agreement, confidentiality and exclusivity agreements; structure and contents of international contracts; e-contracts and smart contracts;

protection of intellectual property rights and technology transfer; trade, countertrade and trade financing; insurance; agency and distributorship; greenfield investments and M&As; competition law and merger control; employment law; corporate governance and corporate social responsibility; international taxation; and dispute settlement and cross-border enforcement of awards. This second edition updates the discussion of the different topics comprehensively. It also expands many parts and adds sections in relation to new themes that have gained importance since the publication of the first edition. In particular, it addresses legal issues arising out of the digitalization of the global economy with a special focus on choice-of-law questions, smart contracts, e-bills of lading and online dispute settlement. It also draws attention to the impact of China's Belt and Road initiative, Brexit and the 'America First' foreign policy. How this will help you: Of special value is the author's precise

guidance on drafting techniques and contract practice. The clarity of the presentation, the uncompromising consistency in terms of structure and a large body of references to primary and secondary sources presented in this edition ensure that legal professionals, business managers and academics as well as other interested parties can gain easy access to comprehensive and detailed information across jurisdictions.

The International Sale of Goods Michael G. Bridge 2007 This authoritative new edition addresses international sales of goods and covers contracts governed by English law and contracts governed by the United Nations Convention on the International Sale of Goods. Contract issues are tackled in detail as well as property matters and most notably those issues arising out of the use of documents of title, such as marine bills of lading. In addition to the rights and duties of seller and buyer, there is

substantial material on bankers' documentary letters of credit. The book not only includes commentary on decided cases, but also standard form contracts which represent evolving trade practice. Readers gain a contextual understanding of the trading world in which international sales occur through a thorough and detailed case law analysis. New to this edition is commentary on the Contracts Act as well as discussions on conflict of laws, the construction of commercial contracts and e-commerce. The documentary letters of credit and the UN Convention on the International Sale of Goods are given extensive treatment in this edition.

Commercial Law, Selected Statutes 2008
Modern Law of International Trade Ajendra Srivastava 2020-08-31 This book presents a comprehensive and systematic study of the

principal aspects of the modern law of international commercial transactions. Based on diverse sources, including legislative texts, case law, international conventions, and a variety of soft-law instruments, it highlights key topics such as the international sale of goods, international transport, marine insurance, international finance and payments, electronic commerce, international commercial arbitration, standard trade terms, and international harmonization of trade laws. In focusing on the private law aspects of international trade, the book closely analyzes the relevant statutes, case law and the European Union (EU) and international uniform law instruments like the Rome I Regulation, the UN Convention on the Contracts for the International Sale of Goods (CISG), UNCITRAL Model Laws; non-legislative instruments including restatements such as the UNIDROIT Principles on International Commercial Contracts, and rules of business practices codified by the ICC such as the

Arbitration Rules, UCP 600 and different versions of the INCOTERMS. The book clearly explains the key concepts and nuances of the subject, offering incisive and vivid analyses of the major issues and developments. It also traces the evolution of the law of international trade and explores the connection between the *lex mercatoria* and the modern law. Comprehensively examining the issue of international harmonization of trade laws from a variety of perspectives, it provides a detailed account of the work of major players in the field, including UNCITRAL, UNIDROIT, ICC, and the Hague Conference on Private International Law (HCCH). Adopting the comparative law method, this book offers a critical analysis of the laws of two key jurisdictions—India and England—in the context of export trade. In order to stimulate discussion on law reform, it explains the similarities and differences not only between laws of the two countries, but also between the laws of India and England on the one hand, and

the uniform law instruments on the other. Given its breadth of coverage, this book is a valuable reference resource not only for students in the fields of law, international trade, and commercial law, but also for researchers, practitioners and policymakers.

The Rotterdam Rules 2008 Alexander von Ziegler 2010 The 2008 UNCITRAL Convention commonly known as the Rotterdam Rules promises to achieve the hitherto elusive goal of a legal unification of international transport contracts. Its innovative set of rules accommodates such modern trade practices as those treating the carriage of goods by sea as part of wider door-to-door commercial transport operations and those relying on electronic commerce. It closes many gaps in the existing international transport regime, thoroughly specifying the relation of transport documents to the rights and obligations between exporters and importers of goods, and clarifying the interests of credit and insurance in contracts of

carriage. This remarkable book, which will examine the Rotterdam Rules in depth, is edited and written by international lawyers intimately familiar with the negotiations leading to the Convention in finished form. It proceeds by a detailed analysis of each of the Convention's 18 chapters in turn, in a clause-by-clause manner, drawing attention to interlinking implications throughout the document. The book's lucid insights and guidance are especially valuable in showing exactly how the Rules improve the existing international transport regime through its clearer and more complete regulation of such elements as the following: and • allocation of burden of proof; and • evidentiary value of transport documents and electronic records, including non-negotiable documents and records; and • freedom of contract in respect of volume contracts; and • continuous character of the obligation of seaworthiness; and • limits of liability; and • rights during transit; and • recovery of loss of

and damage to goods caused by accidents of navigation; and • jurisdiction and arbitration; and • role of subcontracted carriers both on sea and inland and • role of warehouses, transport terminals and stevedoring companies; and • risks and contract practices of lenders; and • interests of freight forwarders, cargo insurers and liability insurers; and • prevention of maritime fraud. The authors provide a crystal-clear picture that allows the reader to appreciate the balanced way in which the interests of the various stakeholders are addressed by the Rules and the greater legal certainty for each party and its legal position, the freedom to extend the Rules by contract to the whole transport operation, the clear legal basis for the use of electronic transport records, and the flexibility with which the Rules have left room for evolving trade practices. It will be of immeasurable value to practitioners and all parties interested in understanding how the new Convention operates and how the provisions are intended to be

applied after the Convention comes into force.
