

## Writing Academic English Across The Disciplines

*Discipline-Specific Writing* John Flowerdew 2016-09-13 Discipline-Specific Writing provides an introduction and guide to the teaching of this topic for students and trainee teachers. This book highlights the importance of discipline-specific writing as a critical area of competence for students, and covers both the theory and practice of teaching this crucial topic. With chapters from practitioners and researchers working across a wide range of contexts around the world, Discipline-Specific Writing: Explores teaching strategies in a variety of specific areas including science and technology, social science and business; Discusses curriculum development, course design and assessment, providing a framework for the reader; Analyses the teaching of language features including grammar and vocabulary for academic writing; Demonstrates the use of genre analysis, annotated bibliographies and corpora as tools for teaching; Provides practical suggestions for use in the classroom, questions for discussion and additional activities with each chapter. Discipline-Specific Writing is key reading for students taking courses in English for Specific Purposes, Applied Linguistics, TESOL, TEFL and CELTA.

**Foregrounding Ethical Awareness in Composition and English Studies** Sheryl I. Fontaine 1998 This collection of essays is the first sustained look at the emerging ethical concerns in composition and English studies. Unlike other works that may have used ethics as a way to set a particular code of conduct or to examine a particular area of study, this book describes a range of situations, obliging us to reevaluate the ethical systems that we have previously accepted. Fontaine and Hunter have organized the essays into conceptual sections that focus on three of the many ways in which our current situations can be reconsidered. In the first section, "Reevaluating Contemporary Pedagogies," the authors identify ethical problems that arise within some of our most widely accepted pedagogical strategies and perspectives. "Competing Obligations" refers to the ethical problems that emerge as teachers and administrators find themselves faced with allegiances to more than one group and more than one vision in the academy. And the authors in "Professional Evolutions" consider ways in which developments and changes in the world outside the English department create ethical conflicts close to home. Together, these essays provide ethical vantage points from which it is incumbent upon us to view our agency in our profession and in our classrooms. The book's wide range of voices and perspectives helps us begin to understand our own personal and professional ethical awareness and to anticipate the issues we all must face.

**Writing Across the Disciplines** Art Young 1986 Young and Fulwiler bring together eighteen essays from writing-across-the-curriculum participants and program staff.

**Academic English Writing** Xiao Chang 2023-11-30

*Genres Across the Disciplines* Hilary Nesi 2012 Genres across the Disciplines presents cutting edge, corpus-based research into student writing in higher education. Genres across the Disciplines is essential reading for those involved in syllabus and materials design for the development of writing in higher education, as well as for those investigating EAP. The book explores creativity and the use of metaphor as students work towards becoming experts in the genres of their discipline. Grounded in the British Academic Written English (BAWE) corpus, the text is rich with authentic examples of assignment tasks, macrostructures, concordances and keywords. Also available separately as a paperback.

*Voices, Identities, Negotiations, and Conflicts: Writing Academic English Across Cultures* Le-Ha Phan 2011-01-27 Provides insights into the process of knowledge construction in EFL/ESL writing - from classrooms to research sites, from the dilemmas and risks NNEST student writers experience in the pursuit of true agency to the confusions and conflicts academics experience in their own writing practices.

**Academic Reading - Second Edition** Janet Giltrow 2002-03-21 This reader has been designed to accompany Giltrow's Academic Writing, one of the key principles of which is that there is a close

connection between the processes of reading and of writing academic prose. Each reading is preceded by introductory commentary, questions, and suggestions for discussion, and the book also includes a brief general introduction. As with Giltrow's Academic Writing, her Academic Reading is a challenging text. At its core are examples of actual academic writing of the sort that students must learn to deal with daily, and to write themselves. As newcomers to the scholarly community, students can find that community's ways of reading and writing mysterious, unpredictable and intimidating. Academic Reading demystifies the scholarly genres, shedding light on their discursive conventions. Throughout, Academic Reading respects the student writer; it engages the reader's interest without ever condescending, and it avoids entirely the arbitrary and the dogmatic. The second edition is expanded to include twenty-one selections, nineteen of which come from scholarly publications, and more than half of which are new to this edition.

*Academic Discourse Across Disciplines* Ken Hyland 2006 This volume reflects the emerging interest in cross-disciplinary variation in both spoken and written academic English, exploring the conventions and modes of persuasion characteristic of different disciplines and which help define academic inquiry. This collection brings together chapters by applied linguists and EAP practitioners from seven different countries. The authors draw on various specialised spoken and written corpora to illustrate the notion of variation and to explore the concept of discipline and the different methodologies they use to investigate these corpora. The book also seeks to make explicit the valuable links that can be made between research into academic speech and writing as text, as process, and as social practice.

**Negotiating Academic Writing in an English-Medium University** Xiaohao Ma 2025-06-30 Building on a collection of students' perspectives and narratives, Ma examines how non-native English speaking (NNES) students negotiate English academic writing (EAW) to reveal the general patterns and distinct routes in addressing challenges in higher education. With the significant expansion of internationalization and student mobility, the discourse on cross-border education and how NNES students navigate the high-stakes educational journey remain pertinent. This book presents an in-depth qualitative study that investigates how NNES students in an English-medium university negotiate the demands of EAW in postgraduate study. The research foregrounds NNES students' experiences and provides a comprehensive understanding of how they perceive, experience, and address the challenges of EAW by focusing on a group of mainland Chinese students studying in Hong Kong. Key topics discussed include the impact of English as an academic lingua franca on non-native speakers, the roles of universities in supporting these students, and lessons of individuals addressing academic challenges. Written for NNES students, researchers and practitioners in higher education, including language professionals and other specialists in language teaching, this compelling text will also interest general readers of academic and linguistic literacy.

**Grammatical Complexity in Academic English** Douglas Biber 2016-05-26 Using corpus-based analyses, the book challenges widely held beliefs about grammatical complexity, academic writing, and linguistic change in written English.

*Learning Through Writing* Eileen M. Herteis 2001

*Key Concepts 2* Barbara Smith-Palinkas 2009 Key Concepts helps students master the academic content, academic vocabulary, and academic reading and writing skills they need to succeed at college.

*Key Concepts 1* Barbara Smith-Palinkas 2010 Key Concepts helps students master the academic content, academic vocabulary, and academic reading and writing skills they need to succeed at college.

**Academic Writing Writing and Reading Across the Disciplines** 2015 This book offers abundant exercises to help the student develop techniques for working productively at each stage of the scholarly writing process, mastering and summarizing difficult scholarly sources, planning, and revising to create good working conditions for the reader.

**Writing in the Academic Disciplines** David R. Russell 2002 "To understand the ways students learn to write, we must go beyond the small and all too often marginalized component of the curriculum that treats writing explicitly and look at the broader, though largely tacit traditions students encounter in the whole

curriculum," explains David R. Russell, in the introduction to this singular study. The updated edition provides a comprehensive history of writing instruction outside general composition courses in American secondary and higher education, from the founding public secondary schools and research universities in the 1870s, through the spread of the writing-across-the-curriculum movement in the 1980s, through the WAC efforts in contemporary curriculums.

*Academic Writing - Third Edition* Janet Giltrow 2002-03-21 Academic Writing is a unique introduction to the subject. As the author puts it in her preface, "this book develops from a strong claim: namely, that style is meaningful." In developing that theme, the author draws meaningfully on theory, especially genre theory, while remaining grounded in the particular. Giltrow presents and discusses examples of actual academic writing of the sort that students must learn to deal with daily, and to write themselves. As newcomers to the scholarly community, students can find that community's ways of reading and writing mysterious, unpredictable and intimidating. Academic Writing demystifies the scholarly genres, shedding light on their discursive conventions and on academic readers' expectations and values. Throughout, Academic Writing respects the student writer; it engages the reader's interest without ever condescending, and it avoids the arbitrary and the dogmatic. The book also offers abundant exercises to help the student develop techniques for working productively at each stage of the scholarly writing process; mastering and summarizing difficult scholarly sources; planning; and revising to create good working conditions for the reader. The third edition of Giltrow's extremely successful book incorporates extensive revisions that integrate the theoretical perspectives of genre theory into the whole of the book in a more organic fashion; the changes are designed to make the book both more attuned to scholarly practice and more accessible to the undergraduate student. Giltrow's Academic Reading is designed as an accompanying reader for Academic Writing.
