

Chiral Intermediates

Our mission is to serve as the definitive online repository for chiral science. Explore, engage, and expand your expertise—the fascinating world of chirality awaits! Chiral alcohols form a versatile class of chiral synthons, since they can be incorporated into the API structures directly as esters or ethers. Common sugars like glucose and fructose are chiral molecules with multiple chiral centers. The arrangement of these chiral centers determines the overall chirality of the sugar molecule. ... The easy way to determine if a molecule is chiral is simply to look for the presence of one or more chiral centers: molecules with chiral centers will (almost always) be chiral. A chiral object and its mirror image are called enantiomorphs (Greek, "opposite forms") or, when referring to molecules, enantiomers. Chirality is a property of asymmetry important in several ... Chirality essentially means 'mirror-image, non-superimposable molecules', and to say that a molecule is chiral is to say that its mirror image (it must have one) is not the same as itself. The meaning of CHIRAL is of or relating to a molecule that is not superimposable on its mirror image. How to use chiral in a sentence. Chiral is the chemistry term we use to describe objects whose mirror image is different from the original. A chiral molecule is a molecule that cannot be superimposed on its mirror image. For a molecule to be chiral, it must contain at least one chiral carbon atom - a carbon atom bonded to four different groups. The term "chiral" (from the Greek for "hand") is applied to molecular systems whose asymmetry results in handedness; that is, the existence of a pair of nonsuperimposable mirror-image shapes (as ...
