*Conflict Resolution in Coastal Zone Management*  
Walter Leal Filho 2008 In view of the importance of coastal areas to Baltic countries, integrated coastal zone management (ICZM) is a matter of prime concern. ICZM is also an important feature of the project Coastal Zone Management in the Baltic Sea Region (COASTMAN), undertaken in the context of the Interreg IIB (Baltic Sea) Programme. These experiences are presented in this book, which begins with an overview of the issue of conflict resolution in coastal zone management followed by a description of a set of administrative and legal processes and of case studies in the following regions: Hamburg (Germany), Haapsalu (Estonia), Klaipėda (Lithuania), Primorsk (Russia), Stockholm (Sweden) and Ventspils (Latvia). The third part presents information relating to the educational and training aspects of conflict resolution in ICZM. Thanks to its scope and trans-national dimension, this Handbook will be instrumental for organisations responsible for ICZM and will provide some inspiration towards initiatives that can be undertaken at the local level in order to better understand, and hopefully address, conflicts arising in coastal areas.

**Advances in Data Management** Zbigniew W Ras 2009-10-27 Data Management is the process of planning, coordinating and controlling data resources. More often, applications need to store and search a large amount of data. Managing Data has been continuously challenged by demands from various areas and applications and has evolved in parallel with advances in hardware and computing techniques. This volume focuses on its recent advances and it is composed of five parts and a total of eighteen chapters. The first part of the book contains five contributions in the area of information retrieval and Web intelligence: a novel approach to solving index selection problem, integrated retrieval from Web of documents and data, bipolarity in database querying, deriving data

summarization through ontologies, and granular computing for Web intelligence. The second part of the book contains four contributions in knowledge discovery area. Its third part contains three contributions in information integration and data security area. The remaining two parts of the book contain six contributions in the area of intelligent agents and applications of data management in medical domain.

*Integrated Marine Biosphere Research: Ocean Sustainability, Under Global Change, for the Benefit of Society* Carol Robinson 2025-11-11

Interdisciplinary research spanning natural and social sciences and society is needed to inform decision-making for sustainable use and conservation of marine resources and services. The Integrated Marine Biosphere Research (IMBeR) project is an interdisciplinary global environmental change research network with the mission to: Promote integrated marine research and enable capabilities for developing and implementing ocean sustainability options within and across the natural and social sciences, and communicate relevant information and knowledge needed by society to secure sustainable, productive and healthy oceans. To achieve this mission, the IMBeR science plan identifies three objectives which inform all IMBeR activities, including the 2019 IMBeR Future Oceans2 open science conference: 1) Understanding and quantifying the state and variability of marine ecosystems, 2) Improving scenarios, predictions and projections of future ocean-human systems at multiple scales and 3) Improving and achieving sustainable ocean governance. This Research Topic welcomes submissions (including perspective and opinion papers, policy briefs, original research articles and reviews) related to any of the three interconnected IMBeR objectives. These submissions could cover (1) the mechanisms of

natural climate variability and anthropogenic global change and impacts on marine biogeochemical cycles, species and ecosystems, and human well-being and livelihoods; (2) modelling studies providing quantitative projections and predictions of future coupled human-marine ecosystems including human well-being and livelihoods, governance processes and infrastructure at global, regional and local scales, (3) syntheses of integrated research highlighting key knowledge gaps, recommendations for future action and quantification of the impact of interdisciplinary networks and capacity building activities and (4) papers related to improving the science-policy-society interface of marine research and aiding transition towards sustainable ocean and coastal governance, including provision and implementation of trade-off options for adaptation and mitigation, improving research co-design and co-production mechanisms and ocean literacy, understanding of the role of economic, social, cultural and political norms and values in marine governance, and integration of human behaviour and decision making into global, regional and local models. The Topic Editors Carol Robinson, Annette Breckwoldt, Alistair Hobday, Eugene Murphy, Prateep Nayak and Alice Newton declare that they are members of the IMBeR scientific steering committee or IMBeR Human Dimensions Working Group and are collaborating with the IMBeR research community.

Doing Qualitative Research in Politics Angela Kachuyevski 2018-03-05 This volume offers unique perspectives on how to engage in methods of inquiry in Political Science. Applying the debate in the field over the validity of qualitative methods, the authors illustrate how various methodological approaches are both rigorous and empirically rich. Each of the chapters consists of a particular methodological approach that offers useful insight into pressing political problems important for policy and for theory building. Drawing upon both positivist and interpretive approaches, the chapters illustrate how to engage in qualitative research involving case studies, content analysis and ethnography, each outlining the "doing" part of research. The volume is theoretically,

thematically and geographically diverse, important for students and scholars across the field.

### **Conflict Management in Divided Societies**

Stefan Wolff 2013-03-01 This exciting and innovative new textbook takes a multi-perspective approach to the study of conflict management in divided societies. Offering a wide range of perspectives from the leading experts in the field, the work explains conflict management from the viewpoint of the political scientist, the constitutional architect, the activist, and the NGO. It examines the philosophies underpinning constitutional design, the actors and processes involved, and the practicalities of the settlement process, combining conceptual and theoretical contributions with empirical case studies. In so doing, it provides a comprehensive global introduction to the study of conflict management in divided societies. Features & benefits of the textbook: Clearly explains the theories underpinning constitutional design including power sharing/liberal consociationalism, centripetalism, power dividing, and territorial solutions Surveys the key actors and processes involved in designing and implementing peace including the evolution of diplomacy in peace-making, and separate chapters about crafting solutions for divided societies from the perspectives of NGOs, the UN, EU and AU Explores the realities on the ground with chapters written by activists and practitioners which draw on their experience of working in conflict zones Written in a clear and engaging style, this work is essential reading for all students of conflict resolution.

### **Building Trust and Constructive Conflict Management in Organizations**

Patricia Elgoibar 2016-06-24 This book presents the most recent theoretical insights and practical intervention methods to (re)build trust between management and organized employees in organizations. Offering a multidisciplinary perspective on trust and conflict management in organizations, the book draws from diverse fields such as organizational psychology, business, law, industrial relations and sociology. It examines the often encountered breaches of

trust between management and organized workers, and the resulting destructive social conflicts, social actions, strikes or dramatic business decisions. Its focus is on trust and conflict management at the organizational level in an industrial relations context: that of employee representatives and management. The book introduces a new theoretical approach: the Tree of Trust, designed to analyse and mediate the interconnected levels of trust and distrust in industrial relations. It presents case studies and practical recommendations to build trust and constructive conflict management in the organizations, and illustrates these by means of experiences from different countries around the globe.

Tracylee Clarke 2015-03-04 A step-by-step guide connecting theory to practice Environmental Conflict Management introduces students to the research and practice of environmental conflict and provides a step-by-step process for engaging stakeholders and other interested parties in the management of environmental disputes. In each chapter, authors Dr. Tracylee Clarke and Dr. Tarla Rai Peterson first introduce a specific concept or process step and then provide exercises, worksheets, role-plays, and brief case studies so students can directly apply what they are learning. The appendix includes six additional extended case studies for further analysis. In addition to providing practical steps for understanding and managing conflict, the text identifies the most relevant laws and policies to help students make more informed decisions. Students will develop techniques for public involvement and community outreach, strategies for effective meeting management, approaches to negotiating options and methodologies for communicating concerns and working through differences, and outlines for implementing and evaluating strategies for sustaining positive community relations.

*So You Think You Can Teach* Dr. Shelton J. Goode 2011-11-10 Why do some professors always receive positive evaluations from students while other instructors struggle from class to class? The answer, according to author Dr. Shelton J. Goode, is that successful professors are able to create a dynamic learning environment for all of their students, regardless of age or level of knowledge. Based on extensive research and experience, *So You Think You Can Teach* shows readers how to recognize and rectify classroom issues that can inhibit the full participation of a diverse student body; create an inclusive learning environment that capitalizes on the creativity and richness that adult learners bring to the classroom; manage student differences by building bridges between the various groups within the classroom; develop the teaching skills necessary to help your students achieve their desired learning goals. This straightforward guide is the product of more than two decades of college and university teaching experience. The lessons and methods developed by Goode give new college professors

and instructors concrete, practical ways to increase their creativity, innovation, and productivity in the classroom. So You Think You Can Teach creates confident, effective teachers with the knowledge and skills to help their students reach their educational goals.
