The Professional Educator Charles B. Myers 1995 This comprehensive and integrative text is designed to introduce teaching as a professional activity that requires a solid grounding in theory and research, responsible judgment, and lifelong professional development. It also provides the student a with a foundation in the social, philosophical, legal, historical, and political aspects of education. The text creates a more practical learning environment than the standard foundations text through a wealth of vivid examples, realistic case studies, and opportunities to practice analyzing and applying implications of theory and research.

Educating Learning Technology Designers Chris DiGiano 2008-11-19 What knowledge and skills do designers of learning technologies need? What is the best way to train them to create

high-quality educational technologies? Distilling the wisdom of expert instructors and designers, this cutting-edge guide offers a clear, accessible balance of theory and practical examples. This cutting-edge guide: synthesizes learning, instructional design, and educational technology perspectives on learning-centered technology — highlighting how interdisciplinary work is driving the fields of the learning sciences and technology design and development offers helpful resources for both faculty and students — including descriptions of a variety of successful courses in learning technology design, examples of student work with commentary by instructors and students, and discussions of "lessons learned" in course development includes a "To the Student" chapter that speaks in plain language about what is exciting and challenging about creating technology for kids Directed to university instructors working with students on developing educational software projects and to managers leading learning technologies development teams, this book is a valuable resource for guiding and inspiring the next generation of designers of learning technologies.

1992 Lectures In Complex Systems Lynn Nadel 1993 For five years the Complex Systems Summer School has contributed greatly to education and research into complex systems. 1992 Lectures in Complex Systems presents a wide array of topics in the field, including chaos, adaptive computation, neuronal oscillations, computational ecologies, the geometry of excitability, quenched disorder, biomolecular complexity, and nonlinear dynamics of social systems. This book is a compilation of many of

the lectures and contributions of the 1992 Complex Systems Summer School. The collective volumes in the Series (Lectures in the Sciences of Complexity, 1989 Lectures in the Sciences of Complexity, 1990 Lectures in Complex Systems, 1991 Lectures in Complex Systems, and now 1992 Lectures in Complex Systems) comprise a growing, broad, interdisciplinary review of the many sciences of complexity—a review unavailable elsewhere. Lectures included in This Volume: Melanie Mitchell: Genetic Algorithms Charles M. Gray: Rhythmic Activity in Neuronal Systems: Insights Into Integrative Function Tad Hogg & Bernardo A. Huberman: Better than Best: The Power of Cooperation A.T. Winifree: The Geometry of Excitability Jonathan S. Yedidia: Quenched Disorder: Understanding Classes Using a Variational Principle and the Replica Method Robert H. Austin: Complexity in Biological Molecules Raymond E.
