Life-Oriented Behavioral Research for Urban Policy Junyi Zhang 2017-01-03 This book presents a life-oriented approach, which is an interdisciplinary methodology proposed for cross-sectoral urban policy decisions such as transport, health, and energy policies. Improving people's quality of life (QOL) is one of the common goals of various urban policies on the one hand, while QOL is closely linked with a variety of life choices on the other. The life-oriented approach argues that life choices in different domains (e.g., residence, neighborhood, health, education, work, family life, leisure and recreation, finance, and travel behavior) are not independent of one another, and ignorance of and inability to understand interdependent life choices may result in a failure of consensus building for policy decisions. The book provides evidence about behavioral interdependencies among life domains based on both extensive literature reviews and case studies covering a broad set of life choices. This work further illustrates interbehavioral analysis frameworks with respect to various life domains, along with a rich set of future research directions. This book deals with life choices in a relatively general way. Thus, it can serve not only as a reference for research, but also as a textbook for teaching and learning in varied behavior-related disciplines.

Internet in the Post-Soviet Area Sergey Davydov 2023-07-10 This book offers a comparative perspective on the technological, economic, and political aspects of Internet development in the post-Soviet countries. In doing so, international experts analyze similarities and differences in various countries throughout the chapters. The volume consists of two parts. The chapters of the first part examine the post-Soviet area as a whole. The second part includes specific case studies on the development of the Internet, either in individual countries or in groups of countries. Countries analyzed are Estonia, Ukraine, Russia as well as three Central Asian countries: Kazakhstan, Uzbekistan and Tajikistan. Topics covered in the volume include, but are not limited to measurement, dynamics, and structure of each national Internet audience; the history of the Internet in the post-Soviet countries; development of infrastructure; Internet regulation and institutional aspects; online markets such as telecommunications, online advertising, e-commerce, and digital content; social and cultural aspects; as well as the transformation of the national media systems. This book is a must-read for students, researchers, and scholars of political science and economics, as well

as policymakers and practitioners interested in a better understanding of Internet development in the post-Soviet area.

Research Methods and Statistics in Physical Education Armel Dawson 2019-03-06 One of the most essential problems that is frequently overlooked is that of planning the daily program for each class. This should be done carefully. It is only the novice who needs to write out in detail the various aspects of the lesson to be taught, although capable, experienced teachers can usually profit by jotting down a few brief notes or key words as they think through the coming lesson Research is a careful, systematic and objective investigation conducted to obtain valid facts, draw conclusions and establish principles regarding an identifiable problem in some field of knowledge. The present book discusses all the aspects of methodology of research in the field of physical education and sports sciences. Hopefully, the present book will be useful for the students, teachers of physical education and sports, layperson, researchers, prospective coaches etc., in many ways.

Encyclopedia of Early Modern Philosophy and the Sciences Dana Jalobeanu 2022-08-27 This Encyclopedia offers a fresh, integrated and creative perspective on the formation and foundations of philosophy and science in European modernity. Combining careful contextual reconstruction with arguments from traditional philosophy, the book examines methodological dimensions, breaks down traditional oppositions such as rationalism vs. empiricism, calls attention to gender issues, to 'insiders and outsiders', minor figures in philosophy, and underground movements, among many other topics. In addition, and in line with important recent transformations in the fields of history of science and early modern philosophy, the volume recognizes the specificity and significance of early modern science and discusses important developments including issues of historiography (such as historical epistemology), the interplay between the material culture and modes of knowledge, expert knowledge and craft knowledge. This book stands at the crossroads of different disciplines and combines their approaches - particularly the history of science, the history of philosophy, contemporary philosophy of science, and intellectual and cultural history. It brings together over 100 philosophers, historians of science, historians of mathematics, and medicine offering a comprehensive view of early modern philosophy and the sciences. It combines and discusses recent results from two very active fields: early modern philosophy and the history of (early

modern) science. Editorial Board EDITORS-IN-CHIEF Dana Jalobeanu University of Bucharest, Romania Charles T. Family Life Education Carol A. Darling 2014-04-23 Contemporary family life educators operate within a wide range of settings and with increasingly varied populations and families. In the third edition of Family Life Education, Darling and Cassidy expose readers to the diverse landscape of the field while laying a comprehensive, research-based, practical foundation for current and future family life educators. The authors, both CFLE-certified, consider the Certified Family Life Educator certification requirements of the National Council on Family Relations throughout the text. Their broad overview of the field includes a brief history and discussion of family life education as an established profession. The authors incorporate theory, research, and practice while also providing guidelines for planning, implementing, and evaluating family life education programs. Chapters on sexuality education, relationship and marriage education, and parenting education highlight some of the more prevalent and visible forms of family life education. Comments from international educators and interactive classroom exercises focus on global trends, building awareness and appreciation of diversity. Discussion questions and activities encourage readers to examine issues and apply what they have learned.

Thermal Modeling of Petroleum Generation Colin Barker 1996 Petroleum exploration has always been limited by the lack of adequate subsurface control. Exploration problems are usually problems of extrapolation i.e. to greater depth, to laterally equivalent rocks, or back through time. Models are widely used as a way of describing complex geological systems so that they can be treated quantitatively and used as the basis for extrapolations and predictions. Models consider, typically, a simplified geological system that can be described mathematically. It is very important to know what simplifying assumptions have been made, when these assumptions are valid, and under what conditions their use may not be appropriate. This requires an understanding of the concepts involved in building the model and how the model operates. Models are best used as a tool for probing the system and evaluating the sensitivity of the conclusions to possible uncertainties in the values of the input parameters. In a sense, models permit experimental petroleum geochemistry and allow the user to answer the What if? questions e.g. What if the geothermal gradient had been higher in the past? What if the organic matter type had been different? This book provides students, exploration geologists, and others who would like to use the available models, with a general idea of how the models work, what they can do, and what their limitations are. It also provides the information necessary to obtain the input data required by the commercial models.
