*Garden Design and Landscaping* Mark Parkes 2020-05-10 Are you looking for a complete guide on landscaping and gardening design? Then keep reading... Once the homework has been done, it is now time to start to think about designing your new landscape. You can proceed one of two ways from here. You can take your plot plan and ideas to a professional or you can go through the design process yourself. Most people start here without doing the homework that you just read about. This is a big mistake because all truly good design must accommodate the items that we cannot change. If you decide to proceed on your own at this point, I have listed a few ideas and recommendations below. I would like to say just a few words on the subject at this point in the process. I am a landscape architect by trade. I am not a plumber, mechanic or electrician. My wife will surely tell you that I am not a painter or an accountant. My point is that we all have our areas of expertise. IF you are not comfortable in the next step or you feel overwhelmed by all the choices of plants, mulches and hardscape treatments, then you should engage a professional in the green industry at this point. This book covers: The Fundamental Of Landscape Design Knowing Everything Before To Start Land Scape Design Guidelines Low-Cost, Easy Raised Beds For Your Landscaping Garden Design: The Main Components Plant Design Overview Tree's And Flowers For Your Landscaping Design The Social And Small City Garden Design Landscape Styles For Different Environment Kinds The Garden Country Style Mine Blowing Landscaping Ideas ...And More You could hire a landscape architect, landscape designer, or nurseryman to help you with your plans. The first two will probably charge a consultation fee. The nurseryman may or may not (if you buy the plants from his establishment). This is money and time well spent. The information that you have previously gathered will make their job extremely easy. This is their area of expertise and armed with the information that you have gathered, they should be able to generate some pretty amazing results in just an hour or so. Who to choose? Here is where you need to do some homework again. It has been my experience over the years that nurserymen tend to design landscapes that are "plant heavy". It makes sense since they are in the business of selling plants. Some landscape architects are too "plant light" resulting in sometimes sterile results. The designer that mixes an appropriate amount of plants, lawn and architecture to satisfy your requirements in an aesthetic manner IS the person you want. You can find the right professional by asking neighbors, looking at landscapes that are appealing to you, and visiting nurseries in the area. Ask if different designers have web sites and view them. Whichever path you take during the design process, please take the time to do your homework before beginning. I cannot stress the idea enough that an informed designer will create a wonderful, and functional landscape almost always. Want more about this book? BUY NOW!

The use of water plants in garden design, aquatic communities, and historical background are discussed. The book underscores the use and management of plant species native to Britain in landscaping; urban landscape and roof gardens; and how to transplant semi-mature trees. The text also describes reclamation and planting of industrial and urban wastelands; landscaping of reservoir margins; and the relationship of plants and air pollution. The book also puts emphasis on the use of vegetation in slope stabilization; planting in tropical lowland areas; planting in hot, arid climates; and the functional use of Australian plants.
