**Automation, 1992: Optimum design, manufacturing processes, and concurrent engineering**

David Albert Hoeltzel 1992

*Journal of Mechanical Design*

1994 Publishes technical papers concerned with the conception, development and design of machines and mechanical systems. Specific areas of concern include: robotic system design; computer coordinated mechanism; expert systems in design; computer-aided engineering; design optimization; mechanism design; kinematics and dynamics of mechanisms; cam design; gear design; continuously variable transmission; power transimssion design; design of

machine elements; design theory and methodology; design technology; stress in design; and reliability in design.

**Concurrent Engineering**

Andrew Kusiak 1993-01-12

Presents a top-down approach to the design, development, testing and recyclability of products, components and systems across a wide range of industries. Starting with the desired result and working back through the details, it shows how to produce goods, taking into account the challenges of actual manufacture, what the reliability requirements should be, quality control, associated costs, customer needs and more. Additional features include case studies and team negotiating. Also well-illustrated with figures, photographs, charts and tables and includes an extensive bibliography.
