**Digital Solutions in Construction Project Management: From Theory to Practice** Nguyễn Tấn Tuấn 2025-08-28 The construction industry is changing faster than ever before. In the past, projects relied heavily on paper-based documentation, manual reporting, and lengthy meetings. Today, digital technology has become an indispensable partner. From scheduling, cost control, and materials management to workforce coordination—everything can now be digitized and displayed clearly on a single screen with just a few clicks. Having spent many years directly involved in project management and technology deployment at Navycons and Consmaterial, I have witnessed the striking differences between “traditional methods” and “digitalized management.” In one project, delays and material shortages occurred due to unsynchronized warehouse data. Yet, within only a few months of implementing an ERP system, project progress improved by 25% and wasteful costs were significantly reduced. These experiences inspired me to write this book.
