The Book Review Digest 2006

101 Experiments in the Philosophy of Everyday Life Roger-Pol Droit 2003-11-06 Roger Pol-Droit's highly original book is a reassessment of our day-to-day engagement with life. In 101 short texts, written with limpid elegance, Droit invites us to reconsider our most ordinary actions as unexpected philosophical events: peeling an apple, trying to lie in a hammock, watching someone sleep, hearing your voice on an answering machine, playing with a small child - activities that, when considered outside of their routine, invite us to experience the familiar in startling new ways. Droit encourages us to go further: pretend to be an animal of your choice, create a wall with your hands, try to walk around your room in total darkness, spend time in the Underground - and observe your oddity.

French bestseller about finding the miraculous in the mundane offers 101 experiments in the philosophy of everyday life.

The Psychogeography of Urban Architecture David Prescott-Steed 2013 This praxis-based book explores how an improvisational, creative and embodied practice such as the derive works to defamiliarise our experience of the late modern built environment, fostering new insight into routinised cultural behaviours. In addition to detailing the key contexts of modernity, this book includes case studies on the work of Viktor Shklovsky, Craig Raine, Georges Perec, plus rare scholarly attention to the postcards of Jim Henson's Uncle Traveling Matt. Tertiary students and early career researchers in the humanities, particularly cultural theory and the creative arts, will read about the work of internationally recognised artists who have responded creatively to the urban landscape in view of its habituation under advanced capitalism. The research aims to provide sufficient detail for the reader to recognise a range of cultural conditions pertaining to the historical period that frames contemporary quotidian experience and that, in turn, informs a wide range of reflexive, creative practices. The book's hybridity (complimenting a traditional scholarly style with auto-ethnographic and journalistic writing) offers the reader an authorial honesty, transparency and humanity in its intellectual, practical, and emotional negotiation of psychogeographic ideas."

International Handbook of Education for Spirituality, Care and Wellbeing Marian de Souza 2009-10-13 Acknowledging and understanding spiritual formation is vital in contemporary education. This book explores the dynamic relationship between education and wellbeing. It examines the theory underpinning the practice of education in different societies where spirituality and care are believed to be at the heart of all educational experiences. The book recognizes that, regardless of the context or type of educational experience, education is a caring activity in which the development of the whole person - body, mind and spirit - is a central aim for teachers and educators in both formal and informal learning. The chapters in this handbook present and discuss topics that

focus on spirituality as an integral part of human experience and, consequently, essential to educational programs which aim to address personal and communal identity, foster resilience, empathy and compassion, and promote meaning and connectedness.
