J. Pahler 2006 The most

reader-friendly text on the

market, ADVANCED

ACCOUNTING brings real-

world accounting topics to the

student's level, presenting

advanced concepts and issues in a flexible, step-by-step approach. This is the only advanced book that completely separates the following three major concepts dealt with in the consolidations area: (1) the general concept of consolidating (2) the concept of a non-controlling interest, and (3) the change or no change in basis of accounting concepts for business combinations. Separating these concepts makes it much easier for students than having to simultaneously learn multiple concepts.
