*Natural Resources Management: Concepts, Methodologies, Tools, and
Applications* Management Association, Information Resources

2016-09-08 The perseveration of our natural environment has become a
critical objective of environmental scientists, business owners, and
citizens alike. Because we depend on natural resources to survive,
uncovering methods for preserving and maintaining these resources has
become a focal point to ensure a high quality of life for future
generations. *Natural Resources Management: Concepts, Methodologies,
Tools, and Applications* emphasizes the importance of land, soil, water,
foliage, and wildlife conservation efforts and management. Focusing on
sustainability solutions and methods for preserving the natural
environment, this critical multi-volume research work is a comprehensive
resource for environmental conservationists, policymakers, researchers,
and graduate-level students interested in identifying key research in the
field of natural resource preservation and management.

CARICOM Perspective 1999

A review of school feeding programmes in the Caribbean Community
Food and Agriculture Organization of the United Nations 2021-10-04

This review provides a snapshot of the state-of-art of School Feeding
Programmes in 14 of the 15 CARICOM Member States. It provides an
overview of the different models of school feeding programmes that
currently exist in the Caribbean, challenges faced and recommendations
for improvement. Among the aspects evaluated include: the governance
structure, nutritional quality of meal served, linkages with small farmers
for the procurement of products used in the meals, involvement of
children in school gardens related activities, etc. The document includes
a case study for each of the participating countries (namely Antigua and
Barbuda, Bahamas, Barbados, Belize, Dominica, Grenada, Guyana, Haiti,
Jamaica, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines,
Suriname and Trinidad and Tobago). For each of these countries, an
Annual Net Benefit Analysis was conducted, using information collected
in 2017. The aim is that the document can provide preliminary
information and recommendations that can be relevant for governments,
public organizations, donors, opinion leaders, private sectors, and others
toward strengthening school feeding programmes in the Caribbean. It
was developed with the support of the University of the West Indies and
the Caribbean Agro-Economic Society under the leadership of Prof.
Carlisle Pemberton and Dr. Hazel Paterson-Andrews.

Science Education in Context Richard K. Coll 2019-02-18 This book
presents an international perspective of the influence of educational
context on science education. The focus is on the interactions between
curriculum development and implementation, particularly in non-
Western and non-English-speaking contexts (i.e., outside the UK, USA,
Australia, NZ, etc.). An important and distinguishing feature of the book
is that it draws upon the experiences and research from local experts
from an extremely diverse cohort across the world (26 countries in total).
The book addresses topics such as: curriculum development; research or
evaluation of an implemented curriculum; discussion of pressures driving

curriculum reform or implementation of new curricula (e. g., technology or environmental education); the influence of political, cultural, societal or religious mores on education; governmental or ministerial drives for curriculum reform; economic or other pressures driving curriculum reform; the influence of external assessment regimes on curriculum; and so on.

The Caribbean in a Changing World Stephanie Fullerton-Cooper 2017-06-23 This collection is a critical reflection of the evolution of Caribbean countries since the demise of the West Indies Federation in 1962. At this historical juncture, some territories opted for independence while others remained dependent territories. The volume examines Caribbean societies in comparative and general ways, covering aspects of their ongoing development and challenges. It covers such areas as Caribbean integration, the state of human capital and social policy in the region, the education sector, Caribbean economic sustainability, and, significantly, the physical environment of the Caribbean. A central question has always been: should these territories have gone independent or stayed under some British tutelage? The book addresses this question, illustrating that these island states have made considerable progress, especially in the maintenance and deepening of democratic practices.
