**Beti Bachao Beti Padhao** Durga Prasad 2018-02-25 DESCRIPTION - Beti Bachao - Beti Padhao (Save Girl Child - Educate Girl Child) Beti Bachao - Beti Padhao is itself self - explanatory what the book is about and what theme or genre it contains in. It is a beautiful collection of 25 inspiring short stories solely, wholly and exclusively on daughters of the society with the principal theme - "Save Girl Child - Educate Girl Child" - based on a campaign launched by our Prime Minister Snehil Shri Narendra Modi Ji in 2015. The very purpose and objective of this campaign coupled with the writing of this book is to save girl child from infanticide by their parents well before their coming to this world and secondly to educate girl child wholeheartedly so that they can be able to be an equal partner to male child in all important levels of society whether economic, political, cultural, religious and so on. And to achieve the objective, the parents, the families, society and over and above all Govt. and Non- Govt. machinery and missionary should come forward to help strengthen the hands of our beloved Prime Minister Snehil Shri Narendra Modi Ji. It is our sheer duty and responsibility to make this pious campaign a grand success for the cause of mankind. Durga Prasad Author 18 February 2018

*Artificial Intelligence, Ethics, and the Digital Society: Pathways to Sustainable Development* Anju Beniwal 2025-06-25 In recent years, the rapid advancement of technology—particularly Artificial Intelligence (AI) and digital innovations—has fundamentally transformed every dimension of human society. These developments have not only reshaped our economies and lifestyles but have also raised critical ethical, environmental, and sociological questions. This edited volume, brings together a diverse range of scholarly contributions that explore the intersections between technological progress, sustainable development, and social well-being. The chapters included in this volume reflect contributions from scholars and researchers across India, encompassing disciplines such as Sociology, History, Economics, Political Science, and Liberal Education. The themes range from the role of AI in everyday life and the impact of smart cities on environmental management, to localized frameworks of sustainability, the digital transformation of food systems, and the media's influence on social awareness campaigns. Special emphasis is placed on how Artificial Intelligence and digital technologies can both aid and challenge the achievement of Sustainable Development Goals (SDGs). Simultaneously, the ethical frameworks surrounding these innovations are explored to ensure technology serves humanity without compromising core societal values. This book also examines grassroots realities and region-specific concerns—such as sustainable practices in Assam, the digitalization of India's organic food sector, and menstrual taboos across cultures—providing an inclusive and

grounded understanding of the diverse sociocultural contexts in which sustainability must be achieved. I hope that this volume serves not only as a valuable academic resource but also as a catalyst for interdisciplinary dialogue and policy innovation. It is my belief that such collaborative and ethical inquiry is essential to building a more just, equitable, and sustainable society in the face of the 21st century's challenges. I am grateful to all the contributors who have enriched this volume with their research and insights. Their dedication to critical inquiry and commitment to social change is what makes this collection both timely and transformative.
