*Data Structures and Program Design in C* Robert Leroy Kruse 1997 Progressing from the concrete to the abstract, and using a number of case studies and sample programs, this text explores structured problem solving, data abstraction, software engineering principles, and the comparative analysis of algorithms as fundamental tools of program design. This edition aims to strengthen the documentation by including informal specification (pre- and post-conditions) with all subprograms. It treats recursion much earlier and emphasizes it repeatedly throughout, also revising all programs to emphasize data abstraction, to develop and employ reusable code, and to strengthen uniformity and elegance of style. New topics

covered include splay trees, red-black trees, and amortized algorithm analysis. There are also new case studies, new exercises and programming projects, and Internet access to the source code for all the programs and program extracts printed in the text.

**Encyclopedia of Computer Science and Technology**

Allen Kent 1989-05-31 "This comprehensive reference work provides immediate, fingertip access to state-of-the-art technology in nearly 700 self-contained articles written by over 900 international authorities. Each article in the Encyclopedia features current developments and trends in computers, software, vendors, and applications...extensive bibliographies of leading figures in the field, such as Samuel Alexander, John von Neumann, and Norbert Wiener...and in-depth analysis of future directions."

**Encyclopedia of**

**Microcomputers** Allen Kent 1989-10-05 "The Encyclopedia of Microcomputers serves as the ideal companion reference

to the popular Encyclopedia of Computer Science and Technology. Now in its 10th year of publication, this timely reference work details the broad spectrum of microcomputer technology, including microcomputer history; explains and illustrates the use of microcomputers throughout academe, business, government, and society in general; and assesses the future impact of this rapidly changing technology."
