Development in Nigeria Edlyne Eze Anugwom 2020-04-13 This book unravels the trajectories and dilemmas of development in Nigeria since its independence in 1960. Despite enormous human and material resources, development progress in Nigeria has not met expectations. By delving into the various factors that have influenced development efforts and initiatives, *Development in Nigeria: Promise on Hold?* aims to draw out lessons to help the country to achieve its potential. In many ways Nigeria typifies the African puzzle of near-misses, a never-ending drive towards development with enormous promise but no real practical output. As in many states within Africa, these failures can be traced to structural inadequacies and the perennial weakness of public institutions. Problems which collectively undermine sustainable development and growth include political corruption, ethnicity, failure of public institutions, distributional injustice, fiscal centralism in a purported federal state, faulty democratic traditions, malevolent elite class, religious and social conflicts, among others. By taking a comprehensive panoramic overview of the country's historical experience as both a military dictatorship and democracy, Edlyne Eze Anugwom presents a nuanced, comprehensive and contemporary interrogation of the ever-dynamic forces and factors in Nigeria's development project. This book's incisive examination of Nigeria's development aspirations over time will be of interest to students of Development and African Studies, as well as to practitioners and multilateral agencies involved in development planning and intervention in Nigeria who are looking for strategies for overcoming the challenges facing the country.

Global Liberalism, Local Populism Guy Ben-Porat 2006-04-28 In

recent years the conflicts in Israel/ Palestine and Northern Ireland continue to oscillate between momentum for peaceful resolution and regression into new cycles of violence or political deadlock. To understand these shifts Guy Ben-Porat provides an in-depth analysis of the global environment and the profound effect it has on local conflicts. Because globalization affects localized social structures, institutions, and political divisions as well as international relationships between states and societies, it offers a unique perspective from which to examine the commonalities and differences between two regions laden with conflict. Ben-Porat reveals how the complex and often contradictory characteristics of globalization both constrain and promote the peace processes in Israel/ Palestine and Northern Ireland. Drawing on scholarship in the field of globalization and on archival research, including interviews with leading businessmen involved in the peace process, Ben-Porat believes that a critical interrogation of the interface between economic interests and policy makers is central to an understanding of the complex relationship between globalization and peace. In clear and convincing arguments, this book presents an important and innovative approach to two of the world's most intractable conflicts.

The Lure of Economic Nationalism Kenneth A. Reinert 2023-08-01 The Lure of Economic Nationalism addresses the continued appeal of economic nationalism. It places economic nationalism in both historical and contemporary contexts, from mercantilism and the writings of Friedrich List to Brexit in the United Kingdom and the Trump Administration in the United States. It also considers the alternative to economic nationalism in the form of a rules-based, multilateral trading system and the World Trade Organization. The book argues that going

beyond zero-sum outcomes is better suited to address current problems, including rising tides of ethnonationalism in many countries and pandemics. The book is written in an accessible manner and draws deeply from research in economics and political science. It will be of interest to policymakers, economists, political scientists and the informed public.

Political Culture, Change, and Security Policy in Nigeria Kalu Kalu 2018-03-15 Demonstrating how political culture facilitates or distorts political preferences and political outcomes, this book explores how the

historical development of social conditions and the current social structures shape understandings and constrain individual and collective actions within the Nigerian political system. *Political Culture, Change, and Security Policy* examines the extent to which specific norms and socialization processes within the political and civic culture abet corruption or the proclivity to engage in corrupt practices and how they help reinforce political attitudes and civic norms that have the potential to undermine the effectiveness of government. It also delineates specific doctrinal models and strategic framework essential to the development and implementation of Nigeria's national security policy, as well as innovative approaches to national development planning. Professor Kalu N. Kalu offers an exhaustive study that integrates several quantitative models in addressing a series of theoretical and empirical questions that inform historical and contemporary issues of the Nigerian project. The general premise is that it is not enough to simply highlight the problems of the state and address the what question, we must also address the why and how questions that drive political change, policy preferences, and competing political outcomes.

Globalization and Social Policy in Africa Tade Akin Aina 2004 Drawing for the most part on empirical and historical studies, the contributors elucidate how ordinary African understand, confront and relate to the complex and competing forces of globalisation. They examine how contemporary and historical dynamics have shaped the ways in which globalisation is interacting with, and defining oft-neglected areas of social policy. The authors engage with, and question current, dominant orthodoxies, showing how prevailing economic thinking, particularly that of the dominant multilateral institutions, has undermined a sense of the importance of social policies relevant to a mode of economic development attuned to social transformation in Africa.
