Impacts of Geoeconomics and Geopolitics on International Business Christiansen, Bryan 2025-11-07

The impacts of geoeconomics and geopolitics on international business are significant in today's global economy. Geoeconomics, geopolitical alliances, trade tensions, and regional conflicts, shape the strategies and operations of multinational corporations. These influence supply chains and market access to regulatory environments and investment decisions. Businesses must navigate the risks and opportunities arising from political instability, economic sanctions, resource competition, and strategic decoupling. Further research may highlight the need for resilience and adaptability in international business strategy.

Impacts of Geoeconomics and Geopolitics on International Business explores how geopolitical tensions and geoeconomic strategies affect the operations, decision-making, and risk management of international businesses. It examines the ways in which firms adapt to shifting global power dynamics, economic nationalism, and regulatory complexities to remain competitive and resilient. This book covers topics such as data analysis, international trade, and national security, and is a useful resource for business owners, geographers, economists, academicians, researchers, and political scientists.

International Business John D. Daniels 2009 For undergraduate and graduate level international business courses. International Business, 12/e is an authoritative and engaging voice on conducting business in international markets.

Basics of International Business Neelankavil 2015-05-18 The field of international business is dynamic, complex, and challenging, vulnerable to fast-breaking events such as economic shifts, political turmoil, and natural disasters. This concise and affordable textbook will help future international business executives acquire the skills to function effectively under these challenging conditions. "Basics of International Business" incorporates coverage of the ongoing turmoil in the world financial markets. It's designed to familiarize students with the external environments that affect international businesses, to show them how to recognize the processes in identifying potential foreign markets, and to help them understand the functional strategies that can be developed to succeed in this highly competitive environment. The text focuses on 'must-know' core concepts in international business. The concepts, theories, and techniques are organized around seven major topical areas: introduction and overview of international business; environmental variables of culture, politics, and economics; entry strategies for new markets and countries; international trade and foreign direct investments; integration of functional areas; specific functioning areas (marketing, finance, accounting, etc.); global outsourcing and its role in international operations. The text is filled with helpful charts, chapter summaries, exercises, and applied cases. A detailed instructor's manual including course outlines, classroom exercises, and a complete test bank is available to adopters on the MES website.

A Guide to Financing Mechanisms in International Business Transactions Sang Man Kim 2019-09-04 This book outlines features of international business transactions, and discusses their various

associated risks. For the successful completion of an international business transaction, depending on its terms, both parties need access to funds. This text deals with financing mechanisms mainly in the international sale of goods and in overseas construction projects. Concerning financing international sale of goods, it discusses export working capital financing, documentary credit, negotiation of bills of exchange, export factoring, and international forfaiting. Concerning financing an overseas construction project, this book discusses supplier and buyer credit, project finance, syndicated loans, and independent guarantees (or standby letters of credit). The book also covers export credit insurance (or export credit guarantee), which is very useful for the facilitation of financing in the international sale of goods and in overseas construction projects.
