The Basics of Media Writing Scott A. Kuehn 2016-12-08 The Basics of Media Writing: A Strategic Approach helps readers develop the essential writing skills and professional habits needed to succeed in 21st-century media careers.

This research-driven, strategy-based media writing textbook digs deeply into how media professionals think and write in journalism, public relations, advertising, and other forms of

strategic communication.

Authors Scott A. Kuehn and Andrew Lingwall have created two comprehensive writing models to help students overcome their problems in finding and developing story topics by giving them "starting points" to begin writing. The Professional Strategy Triangle model shows students how to think critically about the audience, the situation, and the message before starting a news story or persuasive piece and the FAJA four-point model asks students a series of questions about their story type (Fact, Analysis, Judgment, or Action) to guide them to the right angle or organizational structure for their message. Rooted in classical rhetorical methods, this step-by-step technique enables readers to strategically approach each writing task, no matter the format.

Mass Media Writing Gail Baker-Woods 1998 Because journalism and mass media students need and benefit from writing skills for print-based media, this text first provides a

strong foundation in newspaper writing techniques. Following chapters cover other media writing styles and discuss how and why these writing styles differ from (and resemble) newspaper writing. A final chapter discusses legal aspects of writing, including libel, invasion of privacy, and First Amendment rights.
