Writing the Short Film Patricia Cooper 2000 Novice screenwriters can follow the storytelling process--from conception to dramatization to dialogue--and learn how to create a dramatic narrative that is short and complete.

Writing Fiction Janet Burroway 2003 Earlier. Topics include free-writing to revision, plot, style, characterization, dialogue, atmosphere, imagery, and point of view. An anthology of diverse and contemporary short stories followed by suggestions for discussion and writing exercises, illustrates concepts while offering variety in pacing and exposure to this increasingly popular form. The book also discusses key issues including writing workshops, using autobiography as a basis for fiction, using action in stories, using

Creative Writer's Handbook Philip K. Jason 2004 This handbook is the perfect reference for beginning creative writers. It offers abundant illustrations, exercises, and useful techniques in all genres. While emphasizing problem-solving and the mastery of literary conventions, this handbook also takes the apprentice writer on a journey from inspiration to revision. Explores the work of 'classic' modern as well as active contemporary writers through examples of effective stories, essays, poems and plays. An extensive look at fundamental creative writing issues includes attitudes, habits, journal-keeping, point of view, language, invention and research, and more. Appropriate for apprentice creative writers.

Making Shapely Fiction Jerome Stern 2011-04-11 A deft analysis and appreciation of fiction--what makes it work and what can make it fail. Here is a book about the craft of writing fiction that is thoroughly useful from the first to the last page--whether the reader is a beginner, a seasoned writer, or a teacher of writing. You will see how a work takes form and shape once you grasp the principles of momentum, tension, and immediacy. "Tension," Stern says, "is the mother of fiction. When tension and immediacy combine, the story begins." Dialogue and action, beginnings and endings, the true meaning of "write what you know," and a memorable listing of don'ts for fiction writers are all covered. A special section features an Alphabet for Writers: entries range from Accuracy to Zigzag, with enlightening comments about such matters as Cliffhangers, Point of View, Irony, and Transitions.

The Place of Grammar in Writing Instruction Susan Hunter 1995 In this book, the crucial questions about the place of grammar in the writing classroom are asked and answered. Teachers and researchers explore the role of grammar in the teaching of writing and describe ways that grammar instruction has been, is, and should be used in our writing programs. The contributors share their insights from a variety of perspectives: as college composition teachers, as writing center directors, as rhetoricians, as students, and as writers themselves. They are not grammarians in the conventional sense. Rather, they are voices from various writing settings who show college writing teachers how to reconnect writing and grammar. Divided into three sections, the book allows for a progressive observation of the places of grammar in writing instruction. In the section on past attitudes toward grammar instruction, the contributors discuss the history of teaching grammar as it relates to teaching writing. In the section on present concerns, contributors re-evaluate the belief that little grammar instruction is needed to teach writing. In the final section, contributors evaluate what we have learned with a view to what we need to learn or teach the next generation of writing teachers about the role of grammar.

Mutes & Earthquakes Bill Manhire 1997 An anthology of writing from 70 writers who have been involved with the editor's writing course. Contributions are included from many of the most well-known contemporary writers, along with essays on creative writing, and Manhire's own introduction, exercises, and notes. Brief biographical notes are given for most of the writers.

The English Teacher's Companion Jim Burke 2003 This book covers the entire English curriculum, from basic reading and writing to digital literacy, media literacy, and integrated instruction.

Writing on the Edge 1991

Building Fiction Jesse Lee Kercheval 2003 No one looks at structure like Jesse Lee Kercheval. She builds a work of fiction just as an architect would design a house--with an eye for details and how all parts of a story or novel interconnect. Even with the most dynamic language, images, and characters, no piece of fiction will work without a strong

infrastructure. Kercheval shows how to build that structure using such tools as point of view, characterization, pacing, and flashbacks. Building Fiction will help you envision the landscape of your fiction and build great stories there.

Turning Life Into Fiction Robin Hemley 2006-05-02 With lively style, good humor and insight, Robin Hemley helps you turn all that you experience into fresh and powerful fiction. By learning to "reimagine", you'll focus on translating real-world people and events into characters and scenes that happen on paper for the first time. You'll think "what if" instead of "what is" in order to take control of your material and cut loose the inhibitions of real life. In these pages, you'll learn how to hone your observation skills and fill your journal with rich and vivid details. (Because, as Hemley writes, "Life is in the details, and so is good fiction".) You'll see how to decide which ideas to bring to fiction and which ones to let go. And you'll learn how to: find the right form - novel, short story, vignette, memoir - for the story you want to tell; use "triggers" to start your reader's imagination rolling; keep your fiction emotionally honest by making the right choices between "the way it happened" and what the story dictates (ask "Is it believable?", not "Did it happen?"); create composites of real people and places that fit the unique needs of your story and empower your imagination; focus your fiction. Make sure everything, every character counts - and eliminate "people who sit at the end of the bar without a role to play"; fictionalize - ethically and legally - other people's stories. Learn your rights as a writer versus their rights to privacy. (Can you use actual names? When do you need to get permission?). To illustrate how writers feed their fiction with reality, Hemley uses examples from his own work and from fiction masters of yesterday and today. At the end of each chapter, challenging exercises help you apply the basic theories and push them even further. An adventurous read, Turning Life Into Fiction will help you create fiction that's just as strange and wonderful and "real" as the life that inspires it.

Writing a Book That Makes a Difference Philip Gerard 2000-03 Philip Gerard analyses books that make a difference, fiction and non-fiction, classic and contemporary, and identifies the elusive ingredients that work together to produce a book that changes minds and lives.

The Art and Craft of Fiction Michael Kardos 2013-02-11 Brief, practical, and wonderfully readable, *The Art and Craft of Fiction* gives aspiring writers all they need — in under 400 pages. Michael Kardos focuses on technique and presents fiction writing as a teachable (and learnable) art. With an organization built on methods and process rather than traditional literary elements, Kardos helps students begin their stories, write strong scenes, use images and detail, revise for aesthetics and mechanics, and finish and polish their own stories. He delivers clear instruction, effective examples, and assignments that build toward finished work in a tone reviewers praise as "pitch perfect." A brief fiction anthology at the back of the book — of 15 works that Kardos draws on in his instruction — provides stories that students will love to be inspired by.

Imaginative Writing Janet Burroway 2011 Janet Burroway's bestselling *Imaginative Writing: The Elements of Craft* explores the craft of creative writing in four genres: Fiction, Poetry, Drama, and Creative Nonfiction. A trade author as well as a professor of creative writing, Burroway brings her years of teaching and writing to this book. "Try-This" exercises appear throughout each chapter. Provocative and fun, these exercises help writers develop the specific writing skills discussed within the text. "Working toward a draft" exercises encourage writers to develop their ideas into complete drafts. In response to reviewer requests, the preface "Invitation to the Writer" has been expanded into a full chapter. This new chapter introduces writers to important skills such as reading like a writer, journaling, and participating in the writer's workshop. This book offers lots of ideas and encouragement at a great price!

Micro Fiction Jerome H. Stern 1996 Ten years ago, Jerome Stern, director of the writing program at Florida State, initiated the World's Best Short Short Story Contest. Stories were to be about 250 words long; first prize was a check and a crate of oranges. Two to three thousand stories began to show up annually in Tallahassee, and National Public Radio regularly broadcast the winner. But, more important, the Micro form turned out to be contagious; stories of this "lack of length" now dot the literary magazines. The time seemed right, then, for this anthology, presenting a decade of contest winners and selected finalists. In addition, Stern commissioned Micros, persuading a roster of writers to accept the challenge of completing a story in one page. Jesse Lee Kercheval has a new spin on the sinking of the Titanic; Virgil Suarez sets his sights on the notorious Singapore caning; George Garrett conjures up a wondrous screen treatment pitch; and Antonya Nelson invites us into an eerie landscape. Verve and nerve and astonishing variety are here, with some wild denouements. How short can a Micro be, you wonder. Look up Amy Hempel's contribution, and you'll see.

The Writer's Mentor Ian Jackman 2004 Advice in the words of the most successful writers ever is presented in thematic chapters for easy reference.
