Can You Pass These Tests? Allen D. Bragdon 1987

Organizational Integrity Torin M. Finser 2007-04
Robert Powell uncovers a secret stream of

wisdom that flows through the heart of Christianity--the feminine principle, known in Greek as "Sophia," the being of Holy Wisdom herself. This sacred embodiment, named in the Old Testament as the first living being made by God, has comforted and guided seekers of truth in every age and in every human culture. Powell surveys the wonders and teachings associated with this unacknowledged treasure of Christianity's mystical past--a stream running from the Greek philosophers and King Solomon through the cosmic visions of Hildegard von Bingen, Our Lady of Guadalupe, and the relation of Sophia to Mary the mother of Christ. *The Sophia Teachings* provides accessible and informative insights into the being of Sophia--generally overlooked by modern, patriarchal Christianity and misinterpreted by new age and other movements that often trivialize the meaning and purpose of this significant cosmic entity.

Reading Skills Handbook Harvey S. Wiener 1982-02 "Reading Skills Handbook, 9/e, teaches the essential reading and study skills required for success in college." The cornerstone of the Wiener/Bazerman System, *Reading Skills Handbook, 9/e*, retains the features that have made it a bestseller for more than twenty-five years: flexible format, high-interest readings, clear explanations, and a multitude of practice exercises. The step-by-step approach encourages students to move with confidence from simple to more complex skills. An anthology of readings helps students apply newly learned skills in selections drawn from books, magazines, and newspapers and including essays, articles, textbook pages, journals, fiction, photographs, illustrations, cartoons, advertisements, and Web sites--in short, the wide range of reading opportunities available to today's readers at home or on the job.

Teaching Challenging Texts Lawrence Baines 2013-06-27 Teaching Challenging Texts shows how to increase reading comprehension and enhance student engagement, even with the most challenging texts. Every chapter features ready-to-use, research-based lessons, replete with explicit instructions, handouts, Common Core correlations, and assessments. "Exploring the Future" features fiction by George Orwell, Suzanne Collins, and William Golding; nonfiction by Philip Zimbardo, Stephen Pinker, Abraham Lincoln, Jared Diamond, Dan Ariely, and Ray Kurzweil; images from several films, an old television commercial; and classical and contemporary music. "Understanding the Power of One" features fiction by Victor Hugo and Lori Halse Anderson; nonfiction by Phillis Wheatley, Sojourner Truth, and Edith Hamilton; a young adult book on archaeology, an animated film from Walt Disney, and an episode from Saturday Night Live. An extensive list of free resources and correlations to the Common Core allow teachers to "teach on the cheap." Teaching Difficult Texts brims with "relevant and robust" lessons for a new generation.

A New Protestant Labor Ethic at Work Ken Estey 2002 Estey proposes a labor ethic that emphasizes the "protest" in Protestantism. The purpose of this ethic is to interrupt the drudgery of the Protestant work ethic, which Estey asserts is the dominant cultural ideal in the U.S.

Protestantism must not be about capitulation to capitalism, and a Protestant ethic that works must be one that questions and confronts authority in order to undo the newest and oldest forms of dehumanization -- as they pertain to workers, labor issues, and conditions in the workplace.

Mythology for Teens Zachary Hamby 2021-09-03 Mythology for Teens: Classic Myths in Today's World takes classical mythology to a

new level by relating ancient stories to the culture, history, art, and literature of today. By looking at topics instrumental to both mythology and modern culture, teens are encouraged to question topics such as the repercussions of war, vanity and greed, the workings of fate, the nature of love, the roles of women in society, revenge and forgiveness, the meaning of life, and national identity. The majority of high school humanities and Advanced Placement courses teach classical mythology by simply retelling myths. By using teen-friendly reader's theater scripts to tell the legends, in combination with activities, discussion questions, and exercises that help students apply what they've learned to real life, Mythology for Teens takes the classic myths taught in school and turns them into an engaging, interesting, and fresh way of looking at old material. Jason and the Argonauts through the Ages Jason Colavito 2014-04-07 The story of Jason and the Argonauts is one of the most famous in Greek myth, and its development from the oldest layers of Greek mythology down to the modern age encapsulates the dramatic changes in faith, power and culture that Western civilization has seen over the past three millennia. From the Bronze Age to the Classical Age, from the medieval world to today, the Jason story has been told and retold with new stories, details and meanings. This book explores the epic history of a colorful myth and probes the most ancient origins of the quest for the Golden Fleece--a quest that takes us to the very dawn of Greek religion and its close relationship with Near Eastern peoples and cultures.

From Observables to Unobservables in

Science and Philosophy Richard J. Connell

2000 From Observables to Unobservables in

Science and Philosophy focuses on knowing unobservable real things or attributes by means

of observing real things or attributes, a topic

central to twentieth-century scientific

philosophy. Engaging both current and perennial

issues in metaphysics, epistemology, philosophy

of nature and of science, Connell writes from a

realist perspective. He adds a cogent, well

written, and much needed voice to the current

debate over foundationalism from the

perspective of the undersubscribed quarter of

empirical realism. Principal audiences for this

volume will be scholars and graduate students in

philosophy, working in the Aristotelian tradition.
