**Young at Heart** Hayley Okines 2015-03-16 The amazing and awkward life of Britain's 'oldest' teenager Hayley Okines is just like any other seventeen-year-old: she loves clothes, shopping, TV and boy bands and hates getting up in the morning. But she has the rare genetic condition progeria, which means she ages eight times faster than normal, giving her the body of a 126-year-old woman. Her positive attitude and infectious smile has charmed millions of people, through a series of 'Extraordinary People' TV documentaries. Now in *Young at Heart* Hayley continues her unusual life story, which began with *Old Before My Time*. She reflects on the pains and perks of growing up with progeria; from the heartbreak of being told she will never walk again to the delight of passing her exams

and starting college. She reveals the success of pioneering American drug trials, the sadness of losing younger friends to the disease and considers mood swings, marriage, music and what it's like to be 'famous'. As she approaches her seventeenth birthday, four years beyond the average life expectancy, Hayley looks forward to an independent and healthy future and tries hard not to think of what lies ahead.

**Personality Theories** Eric Shiraev 2016-09-28 *Personality Theories: A Global View* by leading scholar Eric Shiraev takes a dynamic, integrated, and cross-cultural approach to the study of personality. The text is organized around three general questions: Where did personality theories come from? How did the theorists study facts? How do we apply personality theories now? These questions

provide a consistent focus on social context, interdisciplinary science, and applications. Going beyond traditional research from the Western tradition, the book also covers theories and studies rooted in the experiences of other countries and cultures.

Extraordinary Forms of Aging Julia Velten 2022-10-07 While aging and the life-course appear to be normalized processes, the complex construction of age at the intersection of biology, society, and culture remains opaque. This study contributes to a deeper understanding of age(ing) by exploring its construction through the analysis of extraordinary cases. Focusing on life narratives of centenarians and children with progeria, Julia Velten analyzes the way in which these people experience age(ing) and shows how these experiences can contribute to our understanding of age. Situated at the intersection of aging studies and medical humanities, the study explores what extraordinary age(ing) can tell us

about aging processes in general.

The 101 Most Unusual Diseases and Disorders Evelyn B. Kelly 2015-11-23 This book explores serious diseases and disorders that most readers have never heard of, ranging from genetic, infectious, and environmental diseases to autoimmune, idiopathic, and mental disorders. Despite centuries of scientific study and medical research, there are still many human diseases and disorders that remain difficult to manage or are incurable. Some of these maladies are extremely rare, yet, together, they affect a substantial number of people. The 101 Most Unusual Diseases and Disorders examines seldom-seen illnesses, providing high school and college students with an excellent resource for research as well as supplying fascinating reading for general readers interested in diseases and medical science. This book provides clear, easy-to-understand, and scientifically grounded information on the vast number of unusual medical conditions that have

been recorded, covering five kinds of diseases and disorders: genetic, infectious, environmental, mental, and "other," which constitutes diseases of autoimmune and unknown origin. Examples of the medical conditions addressed include autoimmune encephalitis, Ebola, kleptomania, Morgellons syndrome, orthorexia, pneumoconiosis, and Prader-Willi syndrome. Selected case studies enable readers to better empathize with the experiences of those who have these disorders and how these afflictions have affected their lives.

*Dead Dog Lying & Other Stories* Norman German 2015 The stories of *Dead Dog Lying* shine a hard light on society's misfits: the misshapen in mind and body, children mystified by the adult world, and grownups trying--but never quite managing--to get it right. A man receives a message from a cell phone swallowed by a fish he's caught. A boy grows antlers that give him athletic prowess. A fiction writer learns

about reality by walking into an improv play. Long after these allegorical stories are ingested, they will haunt the reader's troubled sleep.
